SP500

Yesterday we found, “a break above yesterday’s high while staying above the critical warning levels triggers the next run to the target zone.” New all-time highs today, thus our assessment of the blue W-v to the 223.6-238.2% target zone (6380-6460) remains correct and all we have to do is **RAISE** the warning levels to: **1st, blue, warning at 6317; 2nd, grey, warning at 6281; 3rd, orange, warning at 6239; 4th, final warning (red) at 6201.**

NASDAQ

No material chance. Quick recap: Last week, we found that “to complete an impulse, we need one more down-up sequence (8-9).” Fast forward, and yesterday, we found “today’s lower close indicates that the W-7 topped yesterday, and the W-8 is underway. Since all prior corrective waves (2, 4, and 6) were one-day affairs, we can expect the same now. Thus, W-9 should still be pending...” BINGO!

Thus, yesterday’s low was W-8, and now W-9 is in progress. Please note that we could also see 13 waves or even 17 waves. When W-9 completes the minimum number of waves during an extended advance, the index will need to break below the critical warning levels to indicate that there will not be 13 waves. If it cannot do that, then another subdivision can be expected. Since we cannot predict the future, we must be aware of this possibility, while acknowledging that we have no way, and nobody has, of knowing if it will happen. That's why the warning levels in combination with the EW are crucial. Not EW alone. Because, as many have thought, after five waves up, the rally might have been over. It could have been, but it failed to break below the red warning level, broke higher, and therefore allowed for nine waves up. We might see the same again. So, DO NOT FRONT RUN, NEVER, EVER! **As such, the warning levels have been raised to**

- **1st warning for the Bulls at 20870**
- **2nd warning for the Bulls at 20750**
- **3rd warning for the Bulls at 20735**
- **4th warning for the Bulls at 20507**

NASDAQ100

The market still does not give us any reason to believe that the gray and green 223.60% is not the next logical target. Thus, we can continue to allow for a bit more upside, contingent on holding above the following, adjusted, warning levels. The first two levels will raise our awareness and attention to a larger top brewing, whereas the third one significantly increases the odds, and the fourth will indicate that the uptrend from the June 23 low is over.

- **1st, blue, warning at 23000;**
- **2nd, grey, warning at 22953;**
- **3rd, orange, warning at 22931;**
- **4th, final warning (red) at 22669**

DOW JONES INDUSTRIAL AVERAGE

New highs in the uptrend for the DOW suggest that the orange impulse path we proposed last week is most likely unfolding. Back then, we found that *"This orange-2 ideally bottoms at 44070+/-100 before the orange W-3 kicks in. ... A break above the orange W-b at 44775 is still needed to confirm that the gray W-v is indeed underway."* The DOW recently bottomed out at 44272 and 44224, which is about ~0.2% away from the ideal target zone, and we can barely pinpoint it any better. Therefore, the price action over the past two days confirms our impulse, and as a result, the warning is raised to: **Radar lock: 44638, Shot across the bow: 44272, First direct hit: 44002, Second hit, sinking: 44638**

SEMI CONDUCTORS

Zooming out on the SOX, we want to share our preferred larger picture EW count, where the current rally is most likely the black W-a. The black W-b should, in this case, begin soon (note this is a monthly chart and “soon” should be interpreted in that time frame: within 1-2 months) and will signal itself below the gray warning level, targeting at most 4200 (as shown), but it may stall around 4800+/-200. Thus, as stated for the NAS: no front running please, as nothing has been confirmed yet.

- **1st warning for the Bulls at 5429**
- **2nd warning for the Bulls at 4996**
- **3rd warning for the Bulls at 4759**
- **4th warning for the Bulls at 4827**

SMALL CAPS

As mentioned several times over the past few days, “we still need a daily close above 1385 (that’s the gray W-b of the green W-4 high) to confirm our thesis [the impulse, i-ii-iii-iv-v, higher].” Today, we achieved a higher close, and thus the impulse, as shown, remains our preferred scenario, similar to the DOW, depending on the index staying above the raised warning levels: **1381, 1369, 1359, and 1339.**

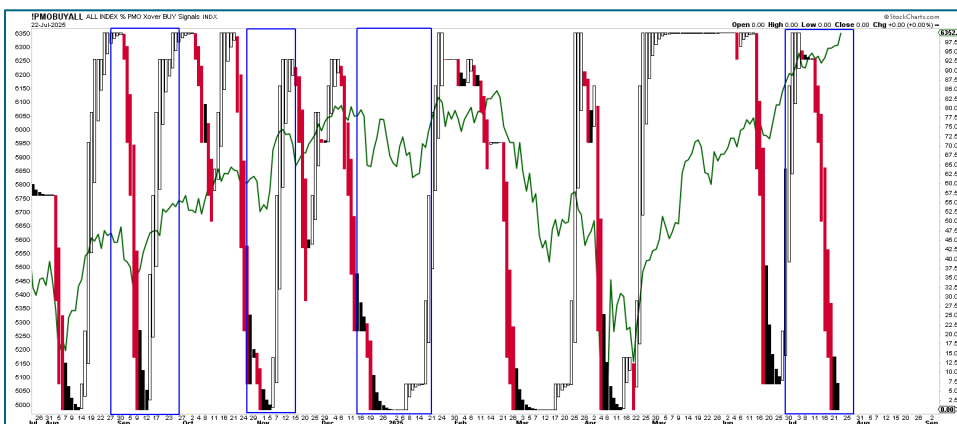

MARKET BREADTH

The recent slight negative divergence (higher prices but lower levels: green vs. red arrows) in the cumulative A/D lines has been erased, indicating that any hint of a bear market or even a steep correction can be relegated to the archives. Bear markets require months of negative divergence. Corrections can still occur, but the A/D line tells us that price will recover.

Meanwhile, our intermediate-term indicator, based on new highs minus new lows and the SAR, remains on a buy/long signal, while the PMO indicator (short-term) is still bottoming out, as it did in prior instances (blue boxes), also signaling an (internal) correction within an uptrend.

CRYPTO CURRENCIES

BITCOIN

No material changes from yesterday, last week, last month, or even last year... Yes, from the short- to the long-term, everything is still perfectly on track. Note that there are still only four (orange) waves from the gray W-ii low made on July 2, and since impulse moves in at least five waves, we still need that orange W-5, and the ~\$136K target seems still an extraordinarily good fit. Additionally, the 176.4% extension at \$ 1,465,000 overlaps precisely with our lower-end target of \$ 164,000 for the big picture. Wanna bet it will get hit!? Thus, the orange W-5 should be underway or is about to, subdividing into the Blue waves **i**, **ii**, **iii**, **iv**, and **v** to ideally reach the 100% fib extension (and bull flag target) at \$135,760. With today's down day, we have the same warning levels: **117441**, **116533**, **115709**, and **111998**.

ETHEREUM

Yesterday, we found “Today’s, and so far, is the first red/down day since the orange W-5 started, strongly suggesting it completed and that the gray W-iv is now underway, aiming for the target zone at \$3450±50. However, always remember that in bull markets, the downside often disappoints, while the upside usually surprises. As is now the case, the gray W-iii has extended beyond the more typical (red) 100% extension and could still attempt the 123.60% extension at \$3955. ...” With today’s further downside, we can discard the possible extension of the gray W-iii to the 123.60% extension and focus on the gray W-iv target zone of \$ 3,450+/-50. From there, we should see the gray W-v materialize to ideally the 138.20% extension, etc. Thus, the last two days are still considered a healthy pullback in a strong uptrend (BTD), and we can keep our warning levels at: **3676**, **3510**, **3312**, and **2933**.”

RIOT

Today's price action (down) indicates there are no changes from yesterday. *Thus, the most likely option is that the green W-3 has topped, and the green W-4 is underway, ideally targeting the green zone (upper end preferred): \$12.50-13.60. Warning levels for the Bulls have been raised to: **13.93, 13.14, 12.33, and 11.90.** Thus, below \$11.90, there will be no green W-4, 5 sequence. That's how these levels help us with our wave count and positioning."*

BINANCE COIN

It has been a while since we provided an update on this altcoin, but with this month's candle, it appears that the potential cup-and-handle pattern (pink) has been completed. The pattern's upside target is around \$1050, while a typical impulse has a 3rd wave target (red W-iii) of about \$1110. This confluence strongly indicates the market can hit this target, provided it stays above the following (monthly) warning levels: **721, 614, 580, and 515**.

GOLD AND MINERS

GLD

Today's price action allows for "more texture" -aka the orange W-iii, iv- and the gray W-iii, iv, v sequence remains our preferred POV, contingent on holding above the warning levels we raised yesterday: **316.24**, **311.09**, **308.32**, **305.12**.

Today's price action allows for "more texture" -aka the red W-iii, iv of the pink W-3- and the blue impulse path to higher prices remains our preferred POV, contingent on holding above the warning levels we set yesterday at: **53.22**, **51.94**, **51.12**, **50.45**.

Today's price action allows for "more texture" -aka the pink W-3, 4 of the blue W-iii- and the blue impulse path higher remains our preferred POV, contingent on holding above the warning levels we set yesterday at: **69.21**, **67.17**, **66.19**, **65.53**.

TRADING IS BORING – JUST THE RULES MA'AM*

- Short-term results are (more) random than intermediate- to long-term. Focus accordingly.
- An "edge" appears only through repetition.
- Thus, a trader's job is not to win, but to relentlessly repeat the same actions.
- Therefore, a trader doesn't wait for opportunities driven by the urge and desire to trade.
- Your responsibility is to follow the rules, and nothing more.
 - Thus, you act only because
 - *"The opportunity has arrived,"*
 - *"It's the rule,"*
 - *"There is no choice but to act."*
- You don't have the authority to decide *"whether or not to follow that rule."*
- Avoid setting a daily profit target.
 - It is irrelevant to you and beyond your control.
- If you are going to reflect, focus on failing to follow the rules. That will teach you!
- A trading system with a 50-50 win/loss ratio (WLR) and a 2-1 win/loss percentage (% WLP) is still more effective than one with a 90-10 (WLR) and a 1-5 (WLP).
 - It's not about how many trades you win.
 - It's about cutting losers and allowing winners to run.

Our new trading systems work best by applying the principle of compounding, which involves reinvesting some or all of your profits in the next trade. The more you compound, the better the returns will be. Please review the table below.

Please do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be directly integrated into TradingView, Alpaca, or Interactive Brokers (IBKR), allowing it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly modify the code to another language if necessary.

*BACKTESTING PERFORMED ON DATA SINCE IPO AND ENDING 04/30/2025						

Past performance is no guarantee of future results. The trading systems' signals are derived from data believed to be accurate, but such accuracy or completeness cannot be guaranteed. It should not be assumed that such signals, past or future, will be profitable, equal past performance, or ensure future performance or trends, primarily since a human writes these emails and may contain errors and omissions.

REFERAL PROGRAM

For every person you refer who signs up for our top-tier newsletter and pays the trial fee of \$49.99, you earn a 50% discount on your next monthly payment, worth up to \$49.99. Invite family, friends, colleagues, neighbors, or anyone interested in the financial markets and eager to stay ahead. If you refer two people each month, your discount covers 100% of your next payment. And if you refer more than two, you can start earning money!

After signing up, all referrals must send us an email that includes your name and email address so that we can verify this information against our records.
