STOCKMARKETS

SP500

There are now enough waves in place to consider the double zigzag decline from the ATH as complete, although we cannot exclude one more subdivision (**alt: a, b, c**)

The simpler line chart shows the decline as a zigzag, because it cannot capture yesterday's pop-and-drop. Thus, while one more leg lower to that 6475-6500 level cannot be excluded, a break above yesterday's high will be a very good sign that the **W-4** was completed this week. Given the current market breadth readings, now is as good as it gets to get **W-5** going.

Our alternative, as shown on the next page, remains that the larger **W-3** has topped. In that case, we are observing a leading diagonal forming, with **W-iv** now in progress. Third waves in an ED tend to reach the 123.6% extension, which in this

case is at SPX6510. Today, we saw 6521. Close enough?! A bounce to 6710+/-20 for the **W-iv**, followed by a drop to ideally 6400 for **W-v**, will confirm the pattern and shift our focus entirely to the **W-4** scenario. If those five waves are complete, we should anticipate a large counter-trend rally (lasting several weeks) before the next move lower. The warning levels for the Bears are: **6690**, 6770, **6870**, **6920**.

NASDAQ100

Yesterday we found, "*Today's high can be viewed as the W-b of an irregular flat. The ideal target for the current C-wave decline is around $23900 ± 100, where both W-c and W-c equal W-a, and W-a, respectively!*"

The index bottomed at 23854 and rallied. Thus, there are now enough waves in place to consider the **W-4** as complete. The positive divergence continues to build on the hourly technical indicators. These are conditions and not trade triggers, but they must be noted. Meanwhile, the daily TIs are in Over Sold (OS) conditions, with the RSI5 having dipped into the "*low risk buy zone,*" which, for those with patience lasting longer than a few hours and days, is profitable 9 out of 10 times.
If we focus on the black rectangle on this daily chart, we see that the index has now reached the ideal **W-4** target zone, and that a **W-5** closer to the ideal target of 26800 is still possible.

Our alternative, as shown on the next page, remains that the larger **W-3** has topped. In that case, we are observing a leading diagonal forming, with W-iv now in progress. Third waves in an ED tend to reach the 123.6% extension, which was almost reached in this case (23700 vs 23854). A bounce to 24800+/-100 for the **W-4**, followed by a drop to ideally ~23100 for **W-5**, will confirm the pattern and shift our focus entirely to the **W-4**. If those five waves are complete, we should anticipate the largest counter-trend rally (lasting several weeks) before

the next move lower. The warning levels for the Bears are: **24299**, **24603**, **25222**, **25663**, **26182**

DOW JONES INDUSTRIAL AVERAGE

Simply put, as long as this week's low holds, **W-4** can be considered complete and W-5 to be underway. But, as with all other indexes, yesterday's high needs to be surpassed by the Bulls to increase confidence that the **W-5** pattern is in progress. Meanwhile, the daily TIs are in Over Sold (OS) conditions, with the RSI5 having dipped into the "*low risk buy zone*," which, for those with patience lasting longer than a few hours and days, is often profitable. The warning levels for the Bears are **46300**, **46863**, **47380**, **48040**

SEMICONDUCTORS
Yesterday we stated "*we now have what counts best as an irregular flat W-4 at today's high, and W-5 is underway to ideally the lower end of the W-4 target zone. Thus, the W-4 is our primary scenario, but we are now even more aware that the larger W-iii may have topped.*"

With today's lower prices, the odds of the W-iii scenario increase even further, and we may see the gray W-iv and v develop. If so, the red W-iv will be confirmed, as five waves down indicate a trend change. Or as recently discussed, "*In that scenario, the current decline is an a-wave, about to complete (see target zone), and the b-wave will probably move back to 7200+/100.*"
There is now positive divergence on the daily RSI5, blue dotted arrow, which can help trigger the **W-iv?**, W-b, or even W-5. Thus, all three options now look higher, contingent on holding above today's low. Unfortunately, three options also mean less certainty, but that is why we have the warning levels for the Bears. We have added an extra level: purple.

These levels are now: **6551**, **6688**, **6882**, **7178**, **7392**. Thus, the odds of the downtrend being over are now 20%, 40%, 60%, 80%, and 100%, respectively. Going forward, we will do the same for the other indexes. Meanwhile, the Bulls are hanging on to their 2nd level (**6688**, **6403**, **5885**, **5480**)

SMALL CAPS

Yesterday, we found "*Today's pop-and-drop pattern provides us with the **W-iv**, **W-v** pattern for the **W-c** [of **W-4**]. The index seems to be aiming for the lower end of the two target zones, which align around the 200d SMA (1355). Note that the daily RSI5 is now nearly as oversold as it was in April. Back then was a great buying opportunity. Do you remember when we focused on the BIMBO concept then?! BIMBO = a Bear Market Is a Major Buying Opportunity. If it was good then, it should be good now.*" Appears all we got was 1364, but that's close enough to 1355. And the RSI5 low-risk buy zone worked like a champ, too. That was an easy trade.

Thus, if yesterday's low holds, we can consider **W-4** complete and **W-5** underway. The warning levels for the Bears are **1406**, **1428**, **1451**, **1480**
MARKET BREADTH AND SENTIMENT

The NYAD and JNK bonds are still in downtrends. If/when they break above their downtrend lines, a new uptrend in the markets will most likely follow.
Meanwhile, our intermediate-term trend indicator remains on a sell/cash signal.

The Zweig Breadth indicator dropped below 0.41 this week, and we can now monitor for a Thrust event (>0.615 within 10 trading days). The previous two ZBTs are shown, and what the market did afterward…
The PMO BUYALL Indicator is not budging, and another up day in the markets will likely give a buy signal
The NYMO dropped below -60 yesterday and reversed today, which has historically provided market participants with a good, low-risk long entry (green boxes), except in 2022, when it was a bear market.
Lastly, sentiment. Although only reliable at extremes (bearishness), we must take it into account. We can see that the CNN Fear & Greed Index is at extreme fear levels, close to those of the April "tariffs crash". Meanwhile, AAII (individual investors) is still neutral, but that data doesn't include yesterday's bad day…
Thus, overall, many market breadth indicators are at levels that suggest a sustainable low is imminent.

CRYPTO CURRENCIES

BITCOIN

Today looks like a bottoming candle: a small body and a very long lower wick: buying pressure. If so, the question will be if that was all of **W-iv** (still within normalcy based on prior 4th waves) or if we see the gray **W-iv**, **v** sequence develop. Regardless, and as discussed *ad nauseum* in recent Newsletter, our view remains that a sustainable bottom is much closer than a top, and that tremendous upside can be had with low risk at this stage. Even a bounce to $ 108+/-8K will still be very profitable for swing traders, with the risk of only a rally to $94K first, followed by a drop to about $74+/-2K. **FYI: the Summer 2021 4th wave decline was ~55% and did a ~62% retracement of the third wave! Thus, the current one can be considered a sandbox play: a 38-50% retracement and a ~38% decline.**

ETHEREUM

Nothing new to add: Our preferred view is that **W-c** of **W-IV** is underway.

Copyright Intelligent Investing, LLC
www.intelligentinvesting.market

RIOT

Yesterday we found that it "*Counts best as having completed the gray W-iii, iv, and that the W-v is now underway. Its ideal target is the 200d SMA at $12.30, with next support at the recent August low ($11±0.50). Thus, this ticker also appears to be closer to a low than a bottom* ☺"

With today's price action, the W-v is confirmed, and the 200-day SMA has been reached. BINGO! A break above the gray W-iv high will strongly suggest the current leg lower is over. Note that the indicators are extremely washed out, and a countertrend rally to at least $17+/-1 seems more likely than not.

TRADING IS BORING – JUST THE RULES, MA'AM*

- Short-term results are (more) random than intermediate- to long-term. Focus accordingly.
- An "edge" appears only through repetition.
- Thus, a trader's job is not to win, but to relentlessly repeat the same actions.
- Therefore, a trader doesn't wait for opportunities driven by the urge and desire to trade.
- Your responsibility is to follow the rules, and nothing more.
    - Thus, you act only because
        - "*The opportunity has arrived*,"
        - "*It's the rule,*"
        - "*There is no choice but to act*."
- You don't have the authority to decide "*whether or not to follow that rule*."
- Avoid setting a daily profit target.
    - It is irrelevant to you and beyond your control.
- If you are going to reflect, focus on failing to follow the rules. That will teach you!
- A trading system with a 50-50 win/loss ratio (WLR) and a 2-1 win/loss percentage (%, WLP) is still more effective than one with a 90-10 (WLR) and a 1-5 (WLP).
    - It's not about how many trades you win.
    - It's about cutting losers and allowing winners to run.

Did you make a "good trade" today? Well, kudos to you, but if you only looked at the trade's profit to decide whether it was good, you did it all wrong. Specifically, your P/L has nothing to do with that assessment. A profit gained by breaking your rules is the worst trade because it creates a false sense of success in your mind. Conversely, a loss that occurs while perfectly following your rules is a valuable learning experience that helps build a long-term edge.

Unless you can accept this, you haven't truly started trading.

Lastly, the 1st rule in trading is to always minimize your losses! Profits are secondary… Know the difference.

*adapted from "Yumi 🌸, @samuraipips358"

**NOT TRADING ADVICE

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best by applying the compounding principle, which involves reinvesting some or all of your profits in the next trade. The more you compound, the better the returns will be. Please review the table below. All the data for each ETF, CRYPTO, and almost every MAG7+ STOCK is also available **here**.

Please do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analyses. Do not try to combine or correlate them. They track prices and their trends based on several parameters that trigger buy, sell, or hold signals through if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be directly integrated into TradingView, Alpaca, or Interactive Brokers (IBKR), allowing it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly modify the code to another language if necessary.

REFERAL PROGRAM

For every person you refer who signs up for our top-tier newsletter and pays the trial fee of $49.99, you earn a 50% discount on your next monthly payment, worth up to $49.99. Invite family, friends, colleagues, neighbors, or anyone interested in the financial markets and eager to stay ahead. If you refer two people each month, your discount covers 100% of your next payment. And if you refer more than two, you can start earning money!

After signing up, all referrals must send us an email that includes your name and email address so that we can verify this information against our records.

Spread the word!
