STOCKMARKETS

SP500 Outlook: Bullish. Invalidation: 6720. Support: 6915. Resistance: 7050. Target: 6345-7490.

Higher prices as expected, so our primary view is that **W-iii** of **W-3** of **W-iii** of **W-5** is underway, contingent on the index holding above the RAISED Bulls' warning levels at **6917**, **6878**, **6844**, **6824**, and **6720**. Meanwhile, the NYAD continues to make new ATHs. See page 7. That's bullish.

With the index above its rising SMAs and Ichimoku Cloud, which are 100% bullishly stacked (10>20>50>200), we must continue to look for higher prices until proven otherwise.

NDX Outlook: Bullish. Invalidation: 24648. Support: 25350. Resistance: 25830. Target: 26680-28140.

Yesterday, we shared, “A large, potential, symmetrical triangle (purple lines) appears to be forming on the NDX. A breakout, not shown, targets approximately \$28,000.” And we stated “like the SPX, we may be in a **W-1, 2, i, ii** setup. If so, with confirmation on a break above yesterday’s high, the **W-iii, iv, v** path aligns well with the **W-3** target.”

Today's price broke out of the triangle, and contingent on holding above the Bulls' warning levels on the daily chart at **25639**, **25428**, **25086**, **24647**, and **23854**, we expect continued upside per the impulse path shown.

With the index above its rising SMAs and Ichimoku Cloud, which are 100% bullishly stacked (10>20>50>200), we must continue to look for higher prices until proven otherwise. Meanwhile, the NYAD made a new ATH. See page 7. That's also bullish

SOX Outlook: Bullish. Invalidation: 6680. Support: 7100. Resistance: 8000. Target: 8250+/-250

Yesterday, we found “Today’s additional pullback adds weight to the evidence supporting what currently counts as the best **W-4**.” Today’s higher prices confirm that thesis, and **W-5** of **W-iii** should now be underway, ideally to the 100% extension at \$8000. Meanwhile, the warning levels for the Bulls remain at **7521**, **7415**, **7286**, **7082**, and **6680**.

With the index above its rising SMAs and Ichimoku Cloud, which are 100% bullishly stacked (10>20>50>200), we must continue to look for higher prices until proven otherwise. Meanwhile, the NYAD made a new ATH. See page 7. That’s also bullish

DOW Outlook: Bullish. Invalidation: 45728. Support: 48500. Resistance: 49500. Target: 49250-54000

Yesterday we found, "With today's reversal, it appears most likely that the **W-vii** did not top, as we suggested yesterday (may have topped today), but that it is subdividing into another leg higher (**W-c** of **W-vii**). In that case, yesterday's high was **W-a** of **W-vii** and today's low **W-b** of **W-vii**." So far, so good as today's continued upside supports that thesis, and **W-vii** is still underway, contingent on price holding above the following, raised, warning levels for the Bulls: **49197, 48792, 48449, 47853, 47462**.

Thus, there's still no overall change in "the ideal target remains at \$49250-49750, with the possibility of \$ 52-54K."

With the index above its rising SMAs and Ichimoku Cloud, which are 100% bullishly stacked (10>20>50>200), we must continue to look for higher prices until proven otherwise. Meanwhile, the NYAD made a new ATH. See page 7. That's also bullish

SMALL Outlook: Bullish. Invalidation: 1364. Support: 1490. Resistance: 1540. Target: 1750+/-50

Today's continued upside, in line with our expectations, places more weight on the **W-iii** scenario, and our ideal upside target remains at 1750 ± 50. The Bulls' warning levels are slightly adjusted to **1504**, **1486**, **1465**, **1430**, and **1364** because we reached the new high we wanted to see "before raising them." Thus, so far, so good! ☺ The index and our EWP remain on track.

With the index above its rising SMAs and Ichimoku Cloud, which are 100% bullishly stacked (10>20>50>200), we must continue to look for higher prices until proven otherwise. Meanwhile, the NYAD made a new ATH. See page 7. That's also bullish

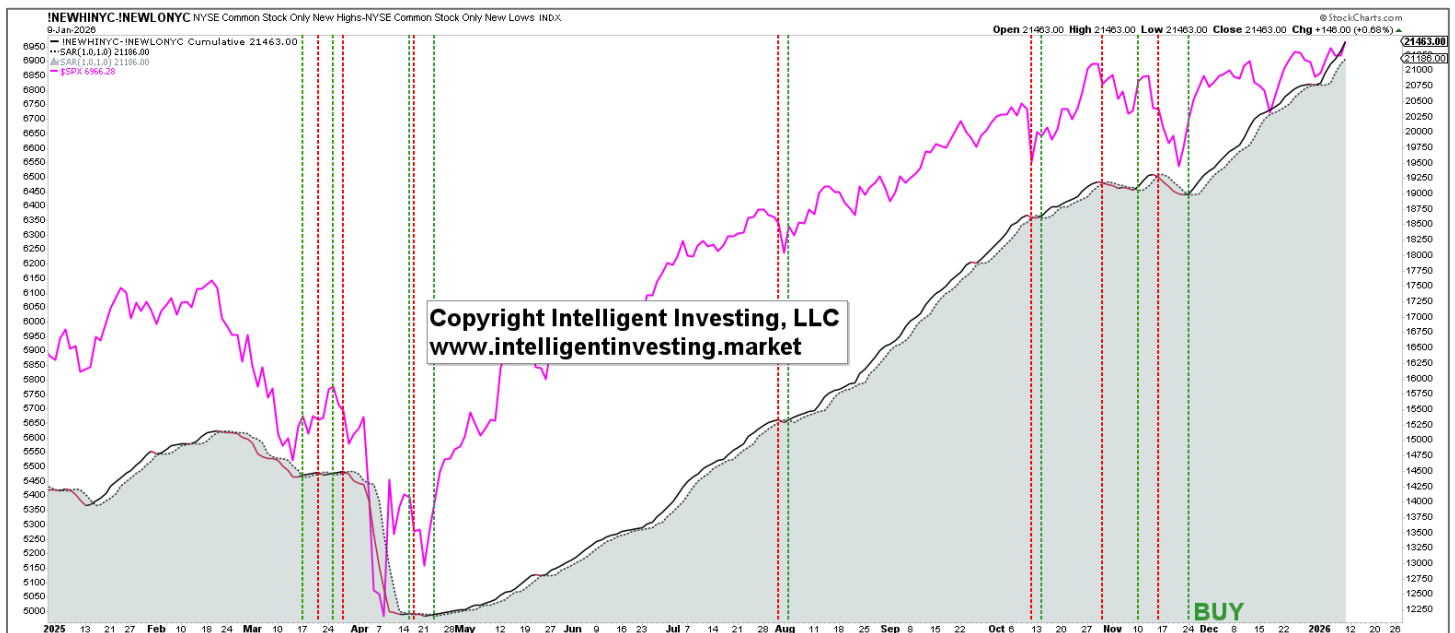

MARKETBREADTH Outlook: Bullish.

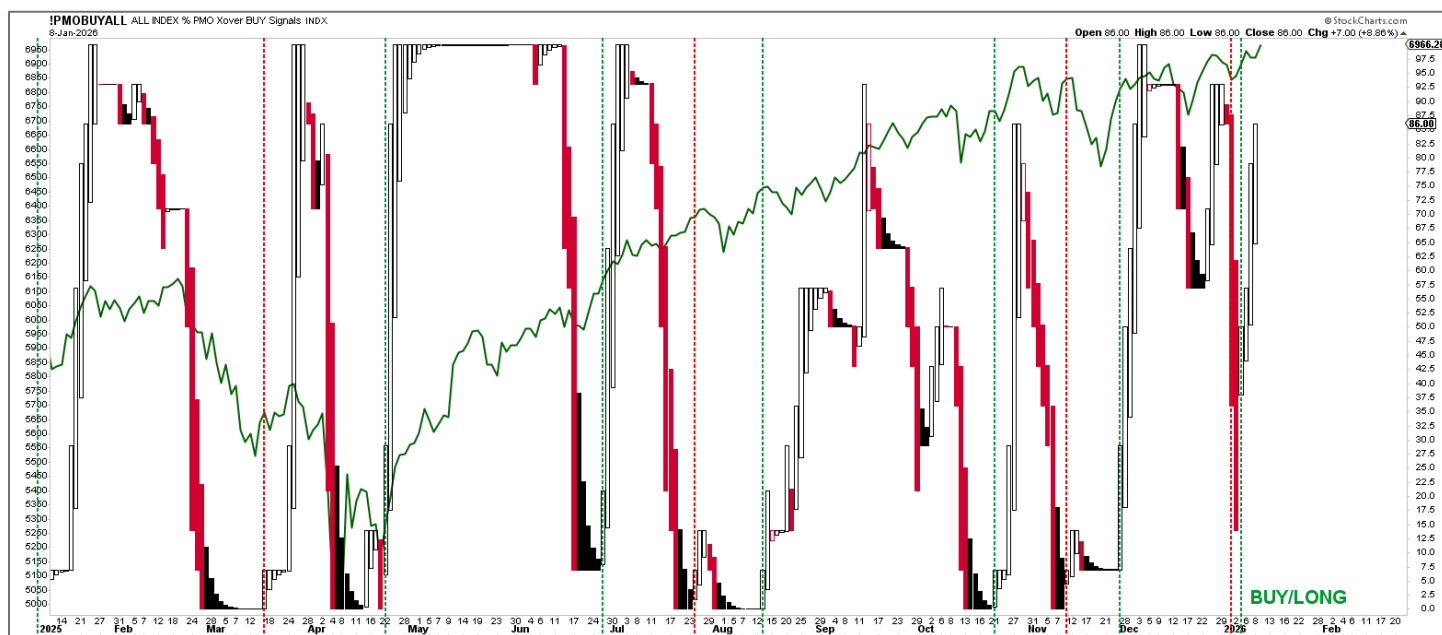

The most critical market breadth indicator, the NYAD, reached a new ATH today. The green arrow indicates the indicator continues to make higher highs: **BULLISH**.

Our intermediate-term trend indicator remains positive and points higher: **BULLISH**.

The short-term buy/sell indicator remains on a buy/long signal since January 5: **BULLISH**.

The S&P500s Summation Index remains on a buy/long and positive since its November 26, 2025 signal: **BULLISH**.

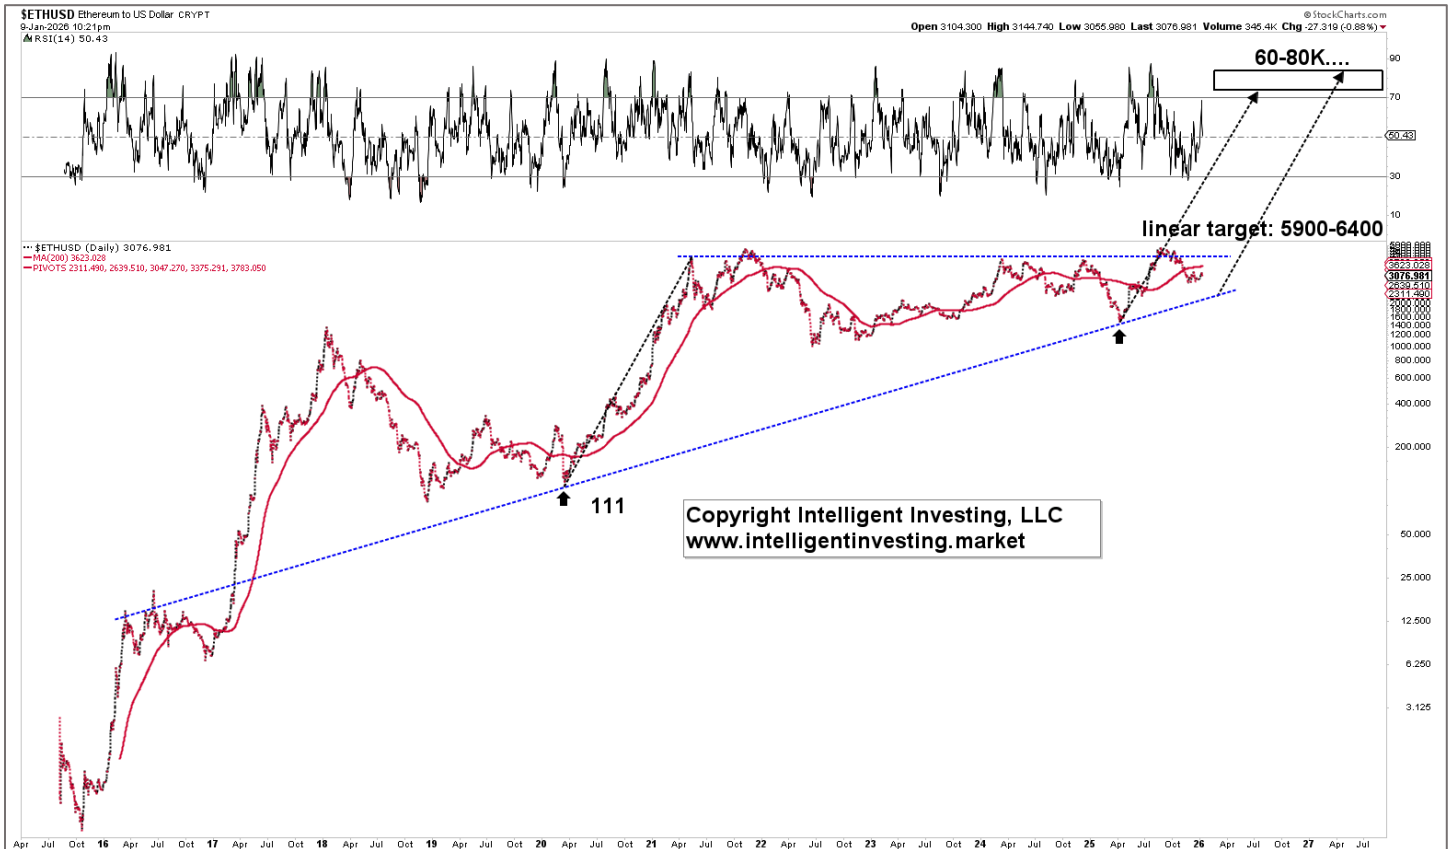

CRYPTO CURRENCIES

ETH Outlook: Bullish. Invalidation: ~2250. Support: ~2700. Resistance: ~4230. Target: 6000+

Simple is best, as Einstein used to say. Here's a simple chart of Ether, and we can say it is still in a long-term uptrend, per the lower, ascending blue trend line. In fact, since 2021, it appears a bullish ascending triangle is forming, contingent on ETH holding that sloping trend line. If we see an immediate breakout, the linear extrapolation of this triangle targets ~\$5900.

If Ethereum drops a bit more this year to that trend line, we should see support around \$2250 hold, and a breakout can then target ~\$6400. From a log-scale perspective, the triangle's maximum width targets a whopping \$60-80K...

GOLD, MINERS & OIL

GLD Outlook: Bullish. Invalidation: 368.52. Support: 396. Resistance: 415. Target: 434+

Our primary expectation remains that the **W-5** of **W-v** of **W-5** of **W-v** is underway, contingent on GLD holding above the Bulls' warning levels shown on the daily chart at **414.75**, **408.83**, **396.25**, **384.01**, and **368.52**. Note that the trend remains 100% bullish in the short term, as price is above the 10d, 20d, 50d, and 200d SMAs, which are bullishly stacked, and all are above the Ichimoku cloud. But negative divergence in the daily RS15, MACD, and Money Flow are now building, red arrows, which forecast the completion of the **W-v**.

GDXJ Outlook: Bullish. Invalidation: 102. Support: 115.25. Resistance: 122. Target: 126-129

GDXJ should still be in its 9th wave, ideally to 126-129, contingent on holding the critical warning levels (3rd and 4th) at: **118.11**, **115.39**, **110.04**, and **102.04**.

TRADING IS BORING – JUST THE RULES, MA'AM*

- Short-term results are (more) random than intermediate- to long-term. Focus accordingly.
- An "edge" appears only through repetition.
- Thus, a trader's job is not to win, but to relentlessly repeat the same actions.
- Therefore, a trader doesn't wait for opportunities driven by the urge and desire to trade.
- Your responsibility is to follow the rules, and nothing more.
 - Thus, you act only because
 - *"The opportunity has arrived,"*
 - *"It's the rule,"*
 - *"There is no choice but to act."*
- You don't have the authority to decide *"whether or not to follow that rule."*
- Avoid setting a daily profit target.
 - It is irrelevant to you and beyond your control.
- If you are going to reflect, focus on failing to follow the rules. That will teach you!
- A trading system with a 50-50 win/loss ratio (WLR) and a 2-1 win/loss percentage (% WLP) is still more effective than one with a 90-10 (WLR) and a 1-5 (WLP).
 - It's not about how many trades you win.
 - It's about cutting losers and allowing winners to run.

Did you make a “good trade” today? Well, kudos to you, but if you only looked at the trade's profit to decide whether it was good, you did it all wrong. Specifically, your P/L has nothing to do with that assessment. A profit gained by breaking your rules is the worst trade because it creates a false sense of success in your mind. Conversely, a loss that occurs while perfectly following your rules is a valuable learning experience that helps build a long-term edge.

Unless you can accept this, you haven't truly started trading.

Lastly, the 1st rule in trading is to always minimize your losses! Profits are secondary... Know the difference.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best by applying the compounding principle, which involves reinvesting some or all of your profits in the next trade. The more you compound, the better the returns will be. Please review the table below. All the data for each ETF, CRYPTO, and almost every MAG7+ STOCK is also available [here](#).

Please do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analyses. Do not try to combine or correlate them. They track prices and their trends based on several parameters that trigger buy, sell, or hold signals through if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be directly integrated into TradingView, Alpaca, or Interactive Brokers (IBKR), allowing it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly modify the code to another language if necessary.
