# STOCKMARKETS

**SP500 Outlook: Bullish. Invalidation: 6720. Support: 6900. Resistance: 7050. Target: 7120-7335.**

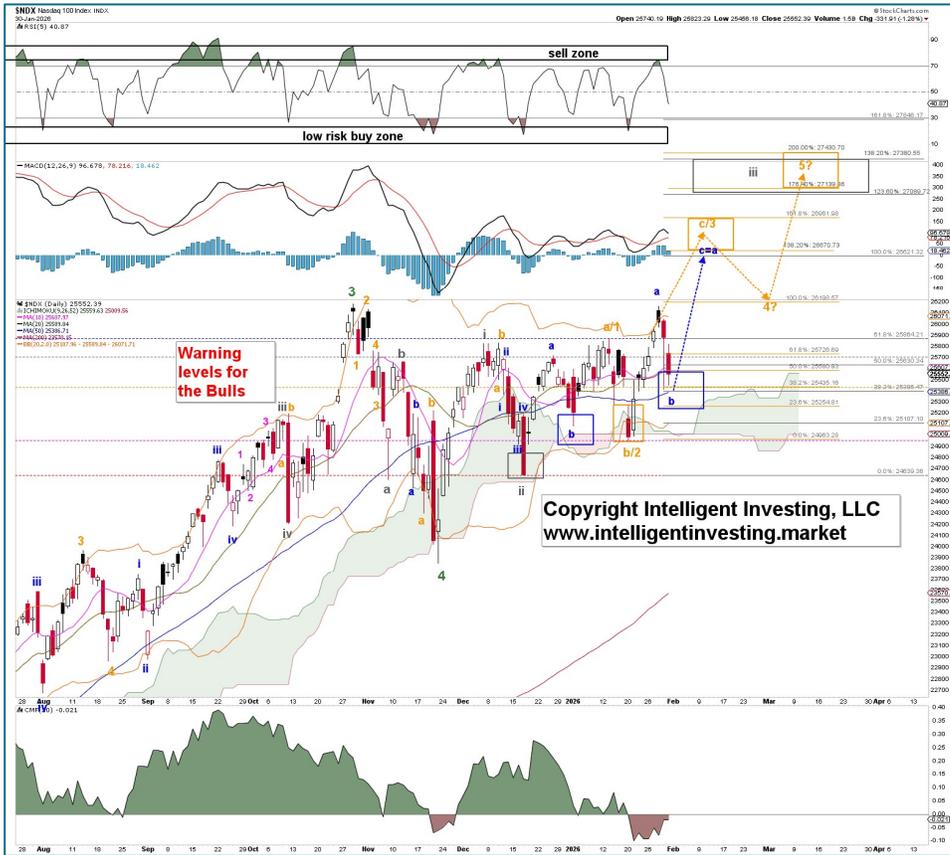

Sjeeez, as soon as we take some deserved days off, y'all can't hold the fort 🤔 😊 But don't worry, we got it covered since we ended on Wednesday with "This means that **W-a** of **W-c** of **W-iii** should now be underway, contingent on the index holding above last week's low. The ideal **W-a** target is the orange 100% extension at ~7065-7095." And the **W-a** has most likely topped, shy of its ideal target. Welcome to the less predictable EDs, as "The "dragging it out until April" ending diagonal (ED), which we introduced on December 17, remains our preferred EWP count until proven otherwise,

Thus, the **W-a** fell short, only reaching 7002... **W-b** should now be underway, may already have finished, contingent on the index holding above the critical warning levels (4<sup>th</sup> and 5<sup>th</sup>): **6958, 6921, 6893, 6789, and 6720**. **W-c** should follow to ideally the 7100-7200 zone as that's where the three different wave degrees (blue, orange and gray) overlap.

Meanwhile, despite all the price action over the last two days, the index hasn't even closed below the 2<sup>nd</sup> (gray) warning level, so it's still way to early days to call in the top, albeit that's possible (see the NDX ALT count)

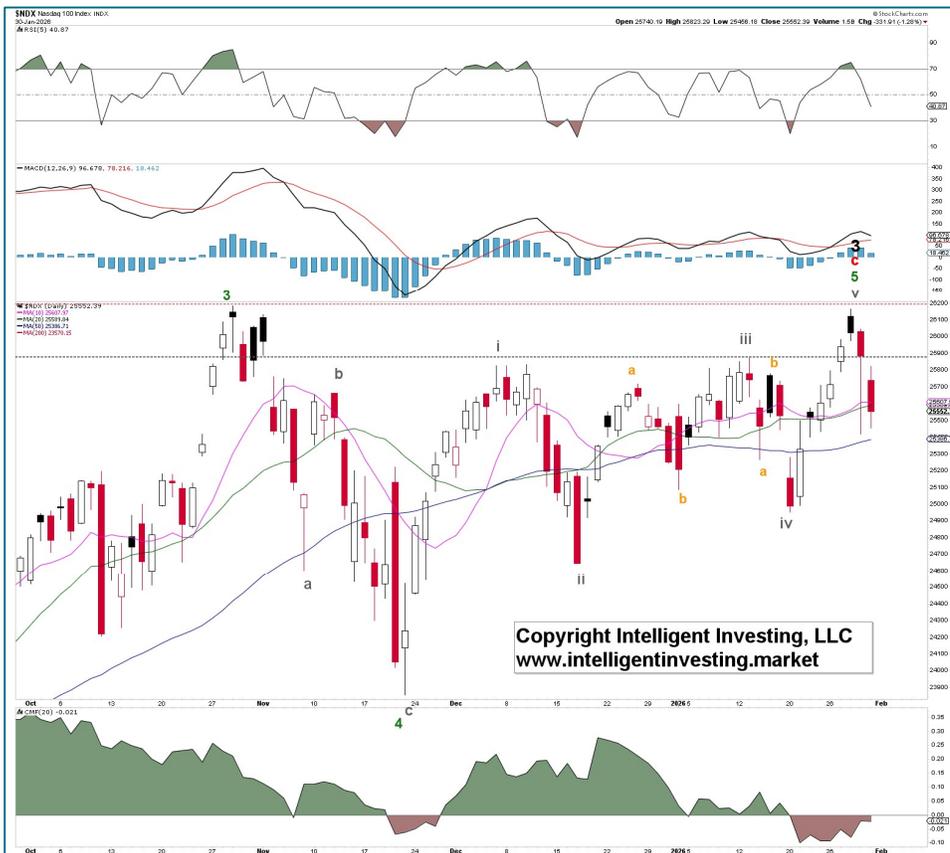

**NDX Outlook: Bullish. Invalidation: 24648. Support: 25155. Resistance: 25830. Target: 27890-28150.**

Like the SPX, the index's **W-c/3** of **W-iii** is likely subdividing into an **abc**, in typical ending diagonal fashion, and contingent on the index holding especially above the 4<sup>th</sup> and 5<sup>th</sup> warning levels we have in place: **25873**, **25708**, **25435**, **24954**, and **24647**.

Assuming **W-b** completed last week, confirmed on a break above Wednesday's high, then the ideal **W-c** of **W-c/3** targets the orange **138.2% extension** at ~26670. And as stated on Wednesday "with the lower end close [the 138.2%] to the gray 100% extension at 26621 and thus a logical upside target, i.e., 3<sup>rd</sup> waves tend to reach the 100% extension of the one-degree-higher 3<sup>rd</sup> wave." Thus, so far, it appears the index took another detour... welcome to EDs...

BUT, and albeit odd because the index has not made a new ATH, we can count the rally from the November low as complete, but once again, this would make for an odd diagonal. So it is the alternative for now.

# SOX Outlook: Bullish. Invalidation: 7372. Support: 7700. Resistance: 8450+/-50. Target: 8900

The **W-iii** we have been tracking as “most likely subdividing into 13 waves, ideally to \$8500+.” appears to have ended in **11** waves in typical ending diagonal fashion and **W-iv** is underway. Thus, the warning levels remain at **8227**, **8009**, **7881**, **7767**, and **7372**, while, as stated prior “Overall, there’s still not five gray waves up from the November low, so we remain bullish.” But the recent two days once again show the less predictable nature of EDs, as it’s a less ideal/textbook, pattern. So, make sure not to get whipsawed.

**DOW Outlook: Bullish. Invalidation: 40669. Support: 45750. Resistance: 5200. Target: 52000-55000**

Wednesday saw a -0.01% day, which meant there were no changes to our forecast, as such small price movements cannot be interpreted. Despite the “carnage” in TECH, the DOW kept on doing nothing with Thursday even ending higher... So, it appears the **W-ix** has been delayed, and **W-viii** was still underway. So, **W-ix** is still pending, contingent on the warning levels we have in place: **49197, 48792, 48449, 47853, 47462**. *Ps: since 5 waves can become 9 waves, we can also get 13 waves up... so only when the critical warning levels are broken can we say the **W-3** top is in.”*

**SMALL Outlook: Bullish. Invalidation: 1464. Support: 1540. Resistance: 1600. Target: 1700+/-50**

On Wednesday we found "[this], suggests the *W-iii* ended, and *W-iv* is underway. But remember, after *iv* still comes *v*. The Bulls' warning levels remain at **1578**, **1552**, **1530**, **1504**, and **1465**. Meanwhile, we can address the price action since the gray *W-ii* low as a subdividing *W-iii* (ALT: a, b, ALT: 5), which, from a Fibonacci perspective, would make a lot more sense as *W-iii* tends to reach the 100-123.6% zone and *W-v* the 161.8-176.4% zone. Meanwhile, a low around \$1530, then a potential *c=a* (orange arrow), targets the 123.6% extension exactly and makes for a three-wave *W-iii*: classic ED stuff! So this subdividing ED is starting to grow on us!"

Well, Thursday and Friday didn't change a thing, because the price action in SML was minimal and thus we still expect at least one more wave higher (*W-v*), possible two (*W-c* of *W-iii*, followed by *W-iv* down and *W-v* up)

# CRYPTO CURRENCIES

**BTC Outlook: Bearish. Invalidation: 97943. Support: 71000. Resistance: 81000. Target: 75-80K**

In classic fashion, when we “review[ed] the POTENTIAL bullish path, as it has not been confirmed. That would be on a break above the January high, while holding above the November low,” on Wednesday, the crypto took a dumpster dive per our preferred EWP count, the very next day, so we’re now wrapping up the final 5<sup>th</sup> wave to the ideal target zone.

Thus, an important low, as our bearish target zone is getting very close, be it even for a ~50% retracement back to 98K, possible a 76.4% retracement to \$114K is pending. However, we prefer a new Bull to new ATHs, in line with the annual cycle.

The warning levels for the Bears are lowered to: **81047, 86008, 90481, 94246, and 97943** as we see BTC wrapping up its final **W-3, 4 and 5** over the next few days.

Note how our preferred EWP count matches the Wyckoff Accumulation Pattern, see below, very well. So don't despair we're almost there as we've been tracking all along.

**ETH Outlook: Bearish. Invalidation: 3403. Support: ~2130. Resistance: ~3400. Target: 2200-400**

Of course, as soon as we post the Bullish POTENTIAL pattern on Wednesday, while knowing the Bearish EWP count was still preferred, but just in case to show what's possible, the next day the Bears wasted no time and fully confirmed our preferred count. **Finally.** Thus, as stated on Monday, "No changes from last week as Ether's price remains below all its moving averages and Ichimoku cloud. A 100% downtrend. The silver lining: ALL important bottoms always form under such conditions! But we don't have any signs yet of a low in place.

Thus, as we've stated all along, "a last fifth wave to \$2200-2400 remains our preferred POV, before we see the next (massive?!) leg higher." Thus, an important low, as our bearish target zone is getting very close, be it even for a ~50% retracement back to 3500, possible a 76.4% retracement to 4300 is pending. However, we prefer a new Bull to new ATHs, in line with the annual cycle. The warning levels for the Bears are changed to: **2633, 2784, 3041, 3251, and 3403.**

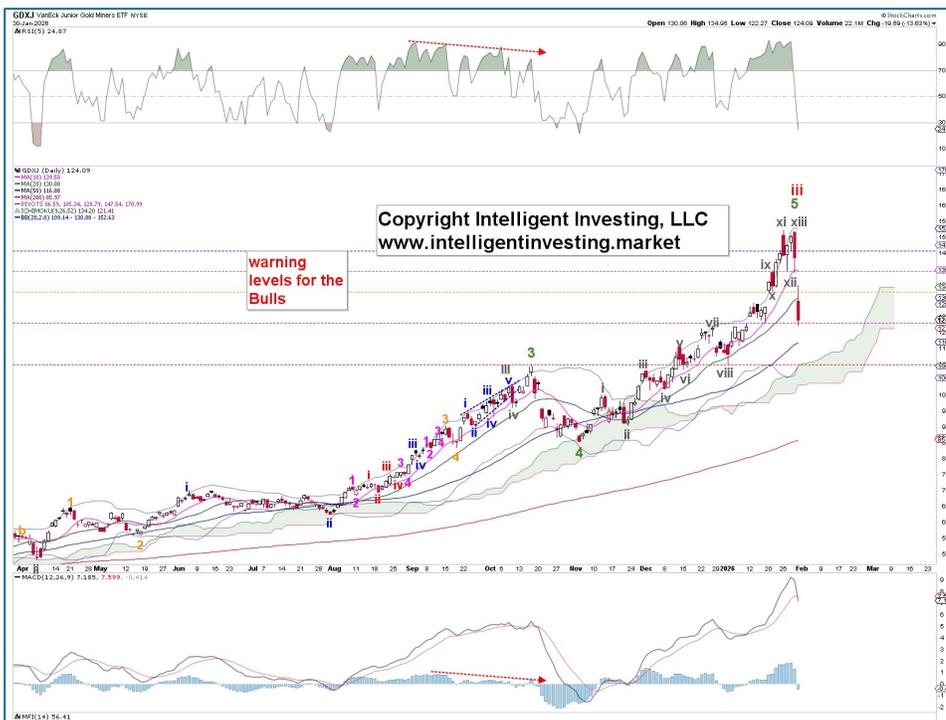

# GOLD, MINERS & OIL

As we warned for GLD and GOLD over the last several days “*Thus, still 0 signs of a top, but watch these [warning] levels carefully as parabolic moves tend to end in spectacular fashion*” GDJ and GDJX down 12.7% and 13.6% on Friday... Ouch... As such we have changed our outlooks to Neutral as “the top” has officially not been confirmed just yet!

**GDJ Outlook: Neutral.**  
**Invalidation: 83. Support: 104.**  
**Resistance: 122. Target: 130**

Thus, the subdividing **W-iii** of **W-5**, which we have been tracking has most likely topped with a last W-pending. However, please never try to bank on 5<sup>th</sup> of 5<sup>th</sup> waves (as GDJX shows the top can be in...) Thus, the warning levels remain at: **109, 104, 100, 94, 83**. And there's now thus a >60% change the top is in as price close almost below the 4<sup>th</sup> warning level...

**GDJX Outlook: Neutral.**  
**Invalidation: 110. Support: 139.**  
**Resistance: 165. Target: 180**

Thus, the subdividing **W-5**, which we have been tracking has most likely Thus, the warning levels remain at: **145, 139, 133, 123, 110**. And there's now thus a >60% change the top is in as price close almost below the 4<sup>th</sup> warning level...

As we warned over the last several days *“Thus, still 0 signs of a top, but watch these [warning] levels carefully as parabolic moves tend to end in spectacular fashion”* GLD down 10.2% and Silver down 31% on Friday... Ouch... As such we have changed our outlooks to Neutral as “the top” has officially not been confirmed just yet!

**GLD Outlook: Neutral.**  
**Invalidation: 417. Support: 460. Resistance: 528. Target: 560**

The subdividing **W-5** we have been tracking has most likely topped, which means a much larger top has struck. No surprise as we’ve been tracking this parabolic move as such, knowing it would not end well. So we keep the warning levels: **481, 460, 448, 437, 417.**

And there’s now thus a >60% change the top is in as price close almost below the 4<sup>th</sup> warning level...

**GOLD Outlook: Neutral.**  
**Invalidation: 4536 Support: 5000. Resistance: 5745. Target: 6100**

The super-extended **W-5**, etc., we have been tracking has most likely topped, which means a larger 4<sup>th</sup> wave back to about \$3300+/-200 should now be underway. Thus, we keep our warning levels at : **5157, 4900, 4772, 4630, 4536.** Thus while up to Thursday there were 0 signs of a top, with Friday’s price action we can say there are certainly signs of a top, as the parabolic move appears to indeed have ended *“in spectacular fashion!”*

**OIL (BRENT) Outlook: Bullish. Invalidation: 58.7 Support: 64.0. Resistance: 70.8. Target: 150+**

For many weeks to months we've been tracking the completion of the last wave **W-v** to ideally \$55-45. However, the price action of the December 16, \$58.72 low may have been all she wrote in typical ending diagonal fashion (less predictable, as it's a very variable pattern). But don't be dismayed, plenty of low risk opportunity left!

Namely we can start to count five waves up from that low to the recent high, strongly suggesting the larger **W-ii** completed and the **W-iii** Bull run to \$150 (and beyond) has started. FYI: in our first monthly long-term only newsletter we shared the big picture bullish wave count we have for BRENT so make sure you got that!

Namely, BRENT has recaptured the 50d, 200d and Ichimoku Cloud over the past 4-5 trading days and is knocking at the upper trendline that has held all upside in check since April 2024. Thus, we are seeing significant bullish developments. Besides, the price action counts well as five waves up. This means two things: we will see a retracement soon, followed by at least another leg higher as these (blue) five waves up are either an **W-a** or **W-1**, with the latter preferred.

We expect BRENT to top out at around \$72+/-2, for **W-1/a**, followed by a retrace to ideally \$64+/-2 for **W-2/b**, and then a rally to \$84+/-2 for **W-3/c** assuming a standard 1.618x **W-a/1** relationship. Thus, the warning levels for the Bulls are now set at **66.81, 64.06, 62.55, 59.96, 58.72**. Thus it is time to don a bullish hat and start looking to BTD instead.

## ETF TRADE ALERTS\*

- Short-term System (EoD): Hold time is the s days to weeks. The trading signal is generated at the EoD.
- Intermediate-term System (EoW): Hold time is weeks to months. The trading signal is generated at the EoW.
- Long-term System (EoM): Hold time is months to years. The trading signal is generated at the EoM.

Green = BUY or SELL, Purple = Open Position (HOLD), Yellow = prior action . BUY or SELL), White = Stay in cash

### DOW JONES\* (DIA, other ETFs are DDM, UDOW)

- **Short-term On 01/30:** Stay in cash and wait for a new signal.
- **Intermediate-term On 01/30:** HOLD the position bought 05/02. BUY signal given at \$41249. UP 18.4%(!)

### NDX\* (QQQ, other ETFs are QLD, TQQQ)

- **Short-term On 01/30:** HOLD the position bought 01/30. Signal given at 25605.47. UP 1.7%
- **Intermediate-term On 01/30:** HOLD the position bought 12/31. Buy Signal was given at 25434.89. UP 0.4%.

### S&P500\* (SPY, other ETFs are SSO, SPXL)

- **Short-term On 01/30:** HOLD the position bought 01/26. Signal given at 6950.23. DOWN 0.2%
- **Intermediate-term On 01/30:** HOLD the position bought 12/31. Buy Signal was given at 6849.09. UP 1.3%.

### SEMI-CONDUCTORS\* (SOXX, other ETFs are USD, SOXL).

- **Short-term On 01/30:** HOLD the position bought 01/30. The Buy signal was given at 7367.47. UP 8.6%
- **Intermediate-term On 01/30:** HOLD the long position bought 05/09 . BUY signal was given at \$4466.50. UP 79.4% (!)

### S&P600 Small Cap\* (IWM, other ETFs are UWM, TNA).

- **Short-term On 01/30:** Stay in cash and wait for a new signal.
- **Intermediate-term On 01/30:** HOLD the position bought 12/31. Buy Signal was given at 1471.61. UP 6.0%

### Bitcoin\* (IBIT)

- **Short-term On 01/30:** Stay in cash and wait for a new signal.
- **Intermediate-term on 01/30:** Stay in cash and wait for a new buy signal.

### Ethereum\* (ETHE)

- **Short-term On 01/30:** Stay in cash and wait for a new signal.
- **Intermediate-term on 01/30:** Stay in cash and wait for a new buy signal.

- **Intermediate-term System On 02/01: SELL the position bought 01/11. The Buy signal was given at \$0.299. DOWN 5.3%.**

## TRADING IS BORING – JUST THE RULES, MA'AM\*

- Short-term results are (more) random than intermediate- to long-term. Focus accordingly.
- An "edge" appears only through repetition.
- Thus, a trader's job is not to win, but to relentlessly repeat the same actions.
- Therefore, a trader doesn't wait for opportunities driven by the urge and desire to trade.
- Your responsibility is to follow the rules, and nothing more.
  - Thus, you act only because
    - *"The opportunity has arrived,"*
    - *"It's the rule,"*
    - *"There is no choice but to act."*
- You don't have the authority to decide *"whether or not to follow that rule."*
- Avoid setting a daily profit target.
  - It is irrelevant to you and beyond your control.
- If you are going to reflect, focus on failing to follow the rules. That will teach you!
- A trading system with a 50-50 win/loss ratio (WLR) and a 2-1 win/loss percentage (% WLP) is still more effective than one with a 90-10 (WLR) and a 1-5 (WLP).
  - It's not about how many trades you win.
  - It's about cutting losers and allowing winners to run.

Did you make a "good trade" today? Well, kudos to you, but if you only looked at the trade's profit to decide whether it was good, you did it all wrong. Specifically, your P/L is unrelated to that assessment. A profit gained by breaking your rules is the worst trade because it creates a false sense of success in your mind. Conversely, a loss that occurs while perfectly following your rules is a valuable learning experience that helps build a long-term edge.

Unless you can accept this, you haven't truly started trading.

Lastly, the 1<sup>st</sup> rule in trading is to always minimize your losses! Profits are secondary... Know the difference.

\*adapted from "Yumi 🌸, @samuraipips358"

\*\*NOT TRADING ADVICE

## \*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best by applying the compounding principle, which involves reinvesting some or all of your profits in the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analyses. Do not try to combine or correlate them. They track prices and trends based on several parameters, triggering buy, sell, or hold signals via if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be directly integrated into TradingView, Alpaca, or Interactive Brokers (IBKR), allowing it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
