TABLE OF CONTENTS

STOCKMARKET

DOW Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) NEUTRAL.

.

WAVE LABEL KEY

[W-3] Major Impulse Wave	[W-c] Intermediate Corrective wave	[W-5] Minor Corrective/Impulse wave	$52,000-$53,000 Fib target

CURRENT WAVE POSITION

W-5 of **W-c** of **W-3** continues as an ugly ending diagonal.

> The price action since the ATH remains rather discombobulated; i.e., overlapping, see the hourly 2nd chart. This is clearly an ending diagonal and these are unreliable due to their overlapping abc-abc-abc-abc-abc pattern; e.g. was that all of "3?" or only "a of 3?" TBD.

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $52,168	Shot across the bow (40%) $51,949	1st hit Caution (60%) $51,614	2nd hit critical (80%) $51,301	3rd hit, ship sinks (100%) $50,827

Key Finding: A clearly defined ending diagonal 5th wave is underway. The problem with EDs is twofold: A) they are overlapping, discombobulated advances (in this case) that don't allow for clear, distinct wave counting, and thus forecasting becomes less reliable. B) it often takes >75% of the price data before one can distinguish the pattern from a corrective bounce (in this case). What we do know is that, when the ED ends, price will drop swiftly back to its beginning (blue W-2 at $51,301). Thus, from a short-term perspective, the warning levels are at: **$52,026**; **$51,614**; and **$51,301**.

SOX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) NEUTRAL.

WAVE LABEL KEY

[W-3]	[W-iv]	[W-c]	[W-c/iii]	13,800+/-100
Major Impulse wave	Intermediate corrective wave	Minor Corrective wave	Minute Impulse wave	~~13,100+/-100~~ 14,100+/-100 Fib target zones

CURRENT WAVE POSITION

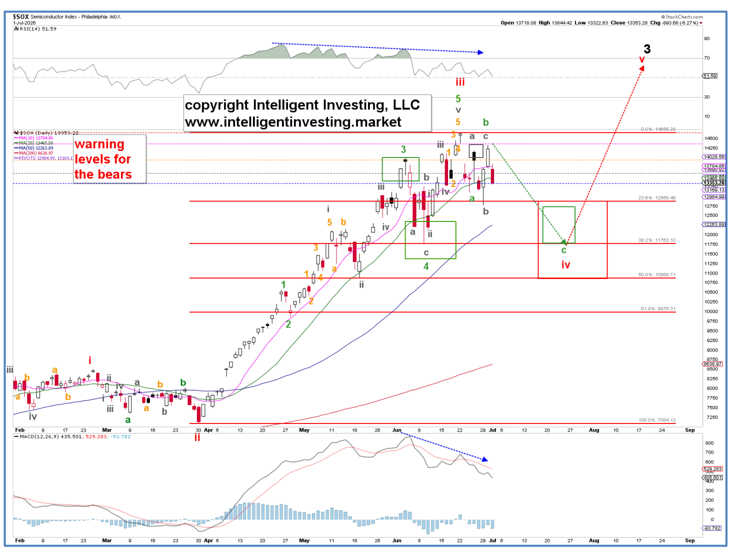
Yesterday we adjusted our view to "*this as an irregular flat W-b/ii (see the 2nd chart).*" And today's drop most likely proved us correct. The upper target zone has been reached, and the index should now be in a subdividing W-iii/c to ideally $11,760

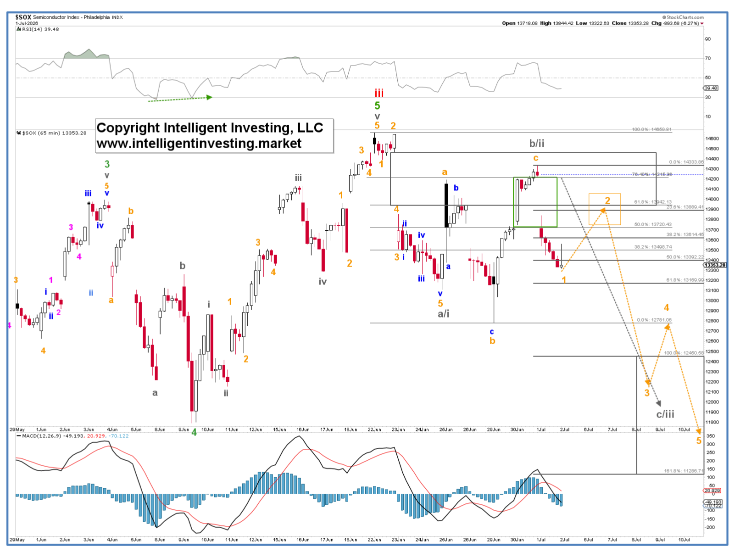
> Today's gap down and continued drop strongly suggest the next leg lower, subdividing into five waves to ideally $11,760, should be underway, contingent on the index staying below yesterday's high. Above it and we need to re-assess, but for now: so far so good, the index remains largely on track with our bigger picture view and path.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

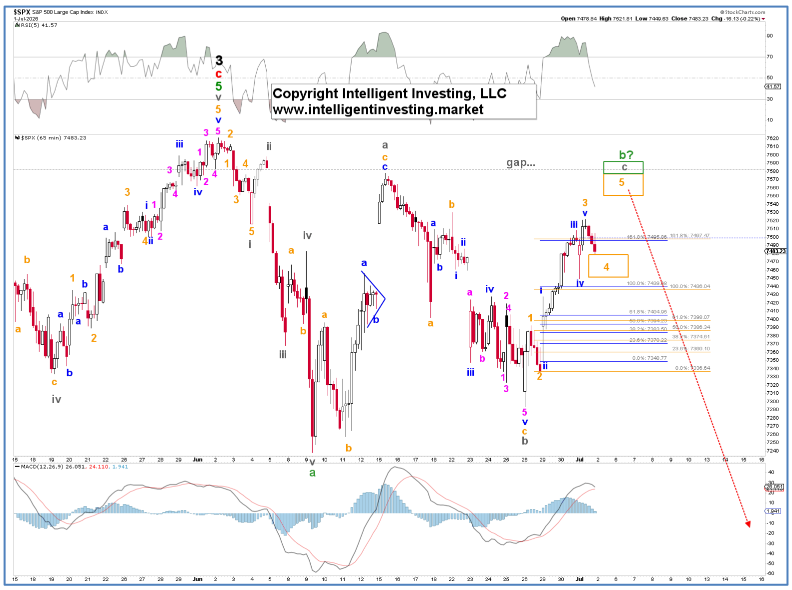
Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
$13,379	$13,597	$13,965	$14,393	$14,655

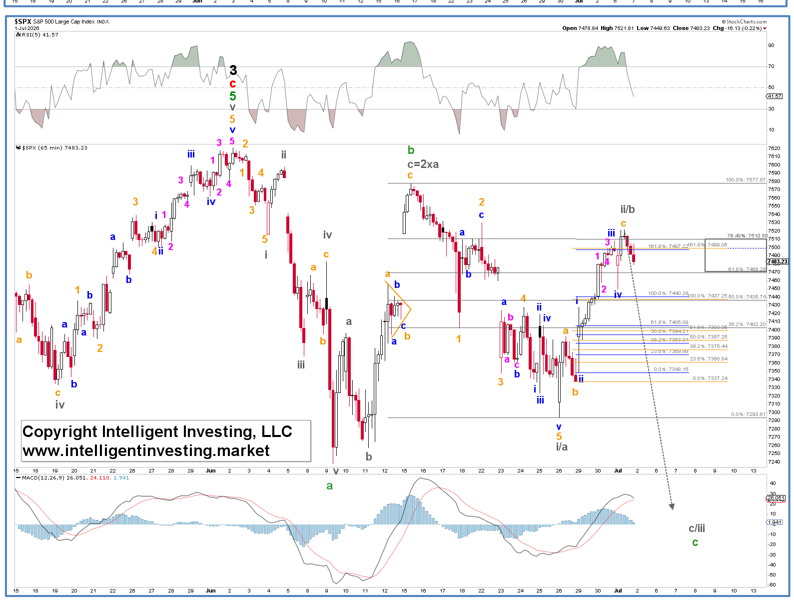
Key Finding: The recent two-day rally was indeed part of a counter-trend move. While yesterday we had no signs a local top is in place, with today's price action it is most likely that the (more) complex (than anticipated) move has ended. We expect an impulse pattern lower per the orange path shown in the 2nd chart.





SPX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) NEUTRAL.





Because the S&P500 is a hybrid index, it is stuck between the DOW and the NAS(100), with some SOX sprinkled in. Since the former is moving higher, the 2nd index is kind of sideways, and the 3rd is moving lower, the SPX is stuck in the middle, and therefore its price action allows for several interpretations.

As such, today we're giving a slightly different presentation to better explain our POV. Overall, this "*stuck between a rock and a hard place*" is not new to those who have been with us for a while, but it may be frustrating to newbies. Well, welcome to the real world, boys! We present three options, and all three suggest that the downside is still likely to come. The question is "*But via which path?*" To answer that question, we must be patient, as the DOW can still move higher, whereas the SOX and NAS(100) look ready to move lower. So, the SPX may be stuck in 2nd gear a little longer.

The issue is that these options (triangle/larger A-B-C/W-b/ii) are, at this stage, essentially identical in structure (ABCs), with the difference being the final length of the wave rather than the structure itself. Since we can only see the structure, while we obviously can't see the length until it's completed, the distinction remains uncertain.

Thus, this is a difficult index to assess now, not because I am deliberately vague or throwing up my hands. No, quite the contrary. I am experienced enough to know when things are unclear. I am not forcing anything. This is an invaluable insight to have! It's because these three viable price patterns produce the same observable evidence at this stage. The difference between these three emerges later in the pattern, when it completes. The triangle forms a series of contracting **ABC** structures, while the larger **A-B-C** simply forms two similar abc rallies, **A** & **C**, with a smaller **abc** (**W-B**) in between. The **W-b/ii** is forming a 3-3-5 (a-b-c) pattern, with a final 4-5 of the C-wave still pending.

Thus, we simply cannot tell the difference at this stage- they all look the same right now. In turn, this makes it impossible to anticipate which it is. But for that, we have our price levels. So not all hope is lost 😉

The first path suggests the triangle is complete, although we can't rule out another drop, rally sequence (first chart; green dotted arrows). A drop below today's low will be a first sign the **W-b** has ended. A drop below Monday's high will then be the 2nd alert for the Bulls, while a drop below Monday's low is the kill switch.

The 2nd option tells us that if the index holds above yesterday's low for the orange **W-4**, 7450-80, and then rallies above today's high, the **W-4, 5** sequence for **W-c** of **W-b** (the latter being called a flat) is unfolding. It should ideally target 7550-80, with the possibility of as high as 7590.

The 3rd option shows that we've so far had a typical ~76.40% retracement, classic for a **W-b/ii**, but the next move will look initially identical to the 1st, with the same price levels to watch, but we'll see a more immediate drop to new lows (7060-7230) for **W-iii/c**.

NDX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) NEUTRAL.

WAVE LABEL KEY (UNCERTAIN AT THE MOMENT)

[W-4] Major Wave Corrective Wave	[W-c/3] Minor Corrective wave	[W-b/iii] Minute Impulse wave	[W-c] Micro Impulse wave	[W-iv, v?] Nano Impulse wave	$27,460-28,555 Fib target zones

CURRENT WAVE POSITION

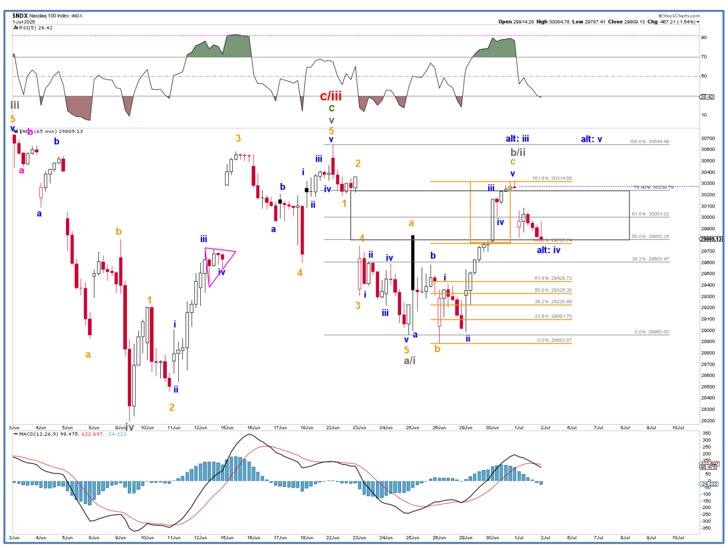
W-b/ii of W-c/3 may have topped, but we can allow for one more, W-iv, v of W-c move .

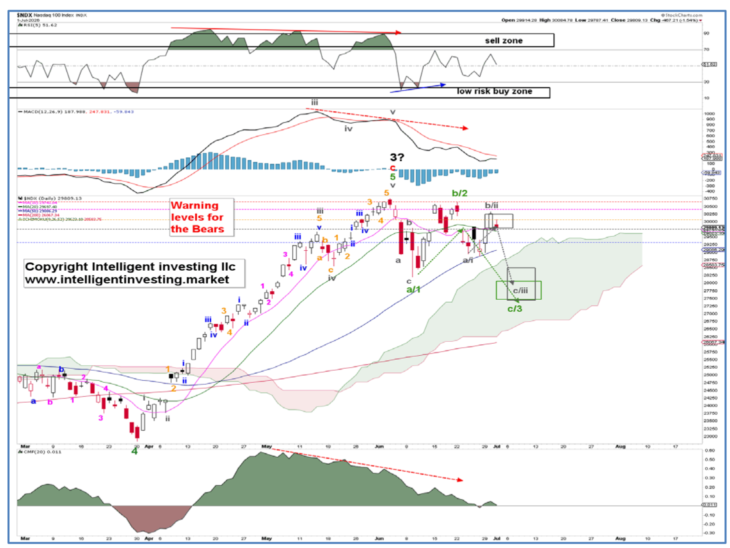
> We can allow for one more rally to complete the countertrend move, but it is no longer necessary. Overall, yesterday the index topped right at the upper end of the ideal W-b/ii target zone, and dropped today, without recovering as the SPX did. Thus, a drop below Monday's high will be a good sign, with confirmation below Monday's low that W-iii/c to ideally $27,460-28,555 is underway.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $29,328	Shot across the bow (40%) $29,748	1st hit caution (60%) $30,089	2nd hit critical (80%) $30,406	3rd hit, ship sinks (100%) $30,642

Key Finding: While, we can allow for as high as $30,435, but above it requires a reset of our perspective, .





SML Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) NEUTRAL. Short-term (days) NEUTRAL.

WAVE LABEL KEY (based on daily chart)

[W-3] Major Degree Impulse wave	**[W-c]** Intermediate Impulse wave	**[W-5]** Minor Impulse wave	**[W-v]** Minute Impulse wave	**[W-5]** Micro Impulse wave	**[W-v]** Nano Impulse wave	**$1800+** Fib target zone

CURRENT WAVE POSITION

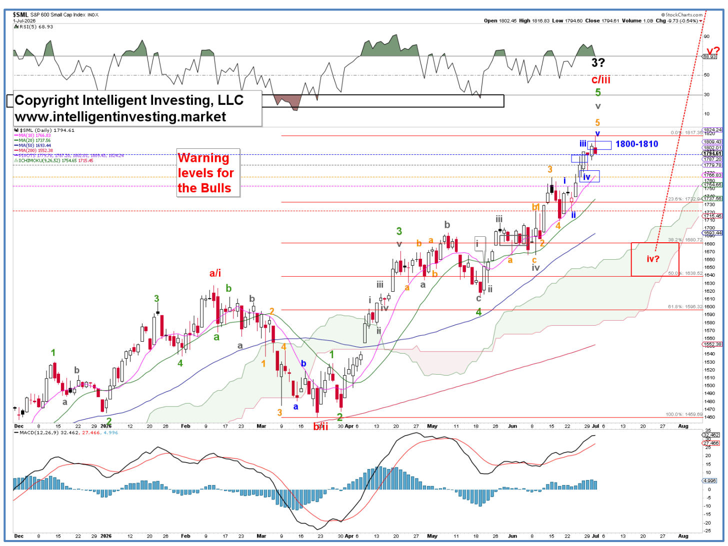
W-5 of **W-c** of **W-3** as a rare expanding ending diagonal is still underway.

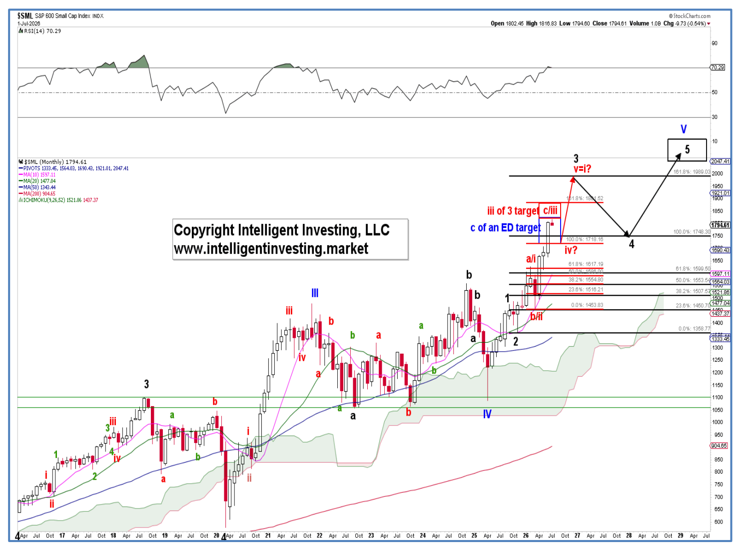
> On Friday, we found "*A smaller 4th and 5th wave should present themselves soon, targeting ideally $1765+/-10 and $1800-1810, respectively.*" Yesterday we got a down day to as low as $1,773 (the smaller 4th wave/), and today the index reached $1,807 (the smaller 5th wave). So far so good! We can raise the warning levels for the Bulls accordingly.

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) **$1,786**	**Shot across the bow (40%)** **$1,773**	**1st hit caution (60%)** **$1,753**	**2nd hit critical (80%)** **$1,722**	**3rd hit, ship sinks (100%)** **$1,709**

Key Finding: W-5 of **W-c** of **W-3** is still underway as an overlapping diagonal. The smaller 4th was yesterday ($1,773 vs $1,765+/-10), and thus the smaller 5th wave is now underway to ideally $1800-1810. We raised the warning levels again, which will help tell us when the uptrend is ending. Note that when diagonals end, the move out of them, in this case lower, is often swift and to their beginning (low $1700s)





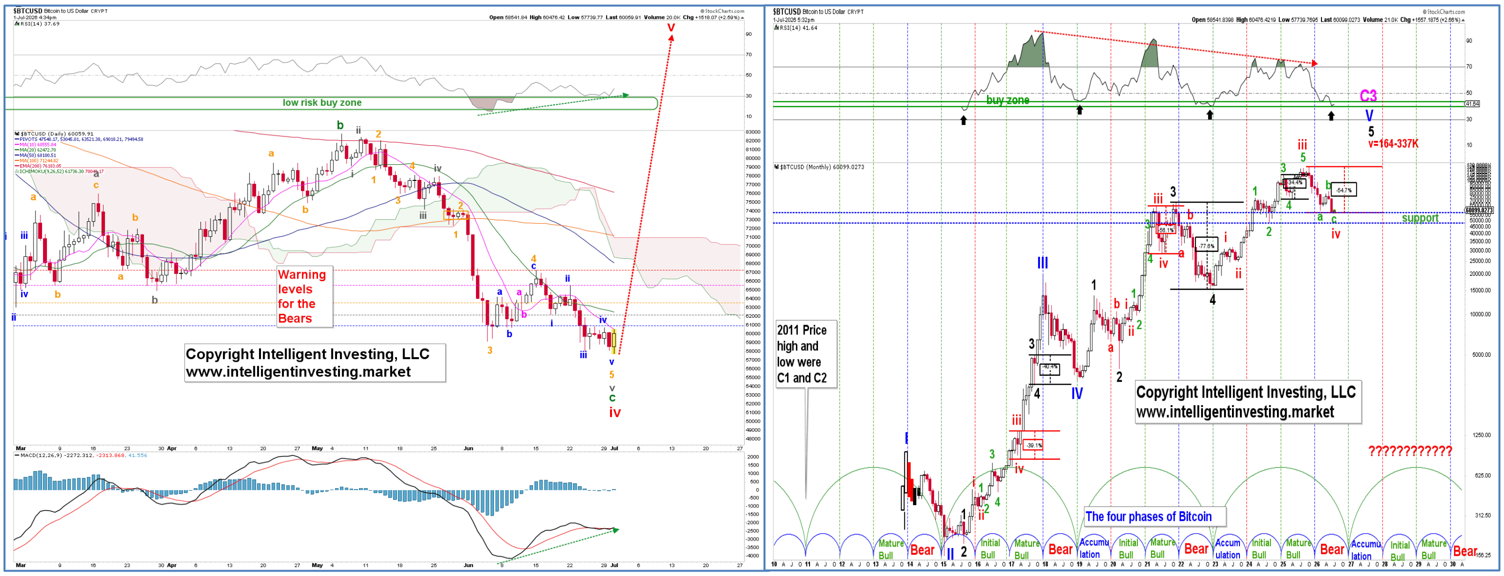
CRYPTO CURRENCIES

BTC Outlook: Long-term (years) BULLISH. Intermediate-term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) BULLISH.

Keeping it short, simple and a little different today: our most recent insights, no surprises to you, are available here:

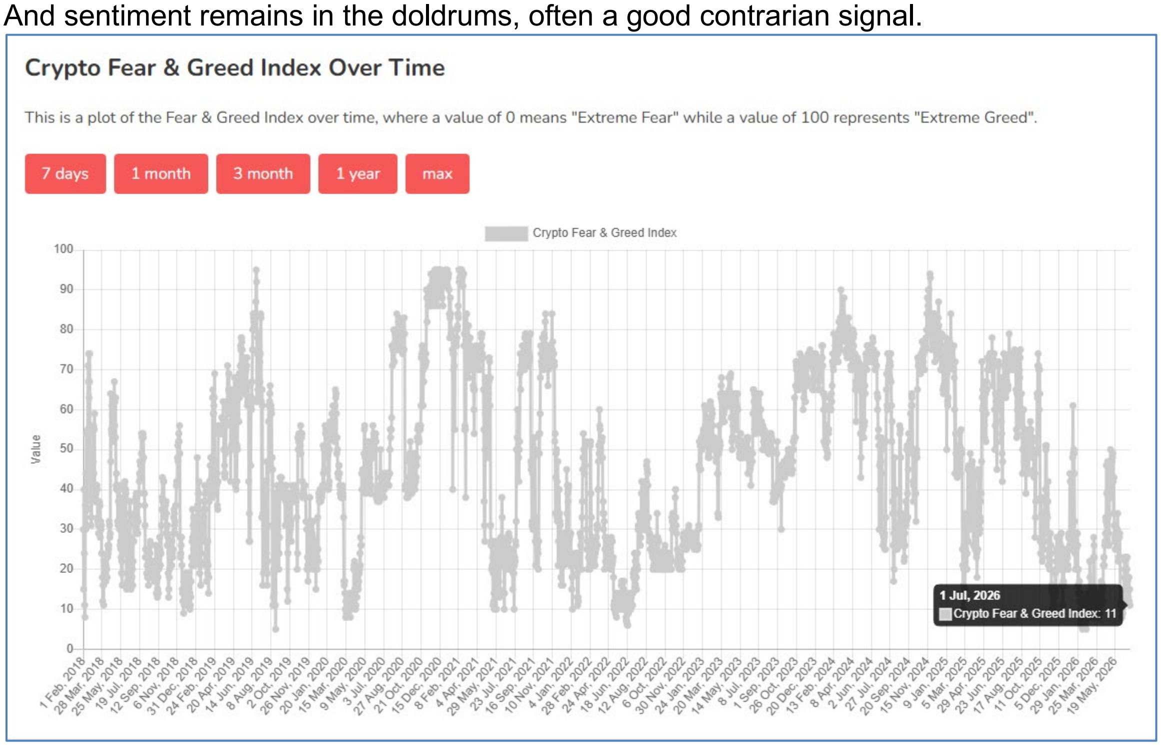
https://www.fxempire.com/forecasts/article/bitcoin-nears-major-low-as-elliott-wave-count-and-momentum-divergences-point-to-reversal-potential-1607854

Charts used in article are straight forward and self-evident



Meanwhile, whales (smart money) are seriously accumulating:
https://x.com/scottmelker/status/2072018080264319168?s=51&t=og5_bFJdNsKNF2655kxwPA

And sentiment remains in the doldrums, often a good contrarian signal.



ETH Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) NEUTRAL. Short-term (days) NEUTRAL.

NO CHANGES FROM YESTERDAY

WAVE LABEL KEY

[W-4] Major Impulse Wave	[W-e] Intermediate Impulse wave	[W-c] Minor Impulse wave	[W-v] Minute Impulse wave	[W-5] Micro Impulse wave	[W-v] Nano Impulse wave	$1,425+/-50 Fib target zone

CURRENT WAVE POSITION

W-4 of **W-v** of **W-5**, etc. should have topped out yesterday, and **W-5** to ideally $1,425+/-50 should be underway, to complete the larger 4th wave correction, from where **W-5** to new ATHs can start.

> The final 5th waves of this decline appear to be underway, ideally reaching a low at $1,425+/-50, before **W-5** can be considered. Potential, strong, positive divergences add weight to the evidence that the downside is losing steam. .

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $1,602	Shot across the bow (40%) $1,669	1st hit Caution (60%) $1,730	2nd hit critical (80%) $1,777	3rd hit, ship sinks (100%) $1,848

Key Finding: The final, smaller 4th and 5th waves have developed exactly as expected. When complete, the large impulse (**W-5**) to new ATHs can start.

RIOT Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) BEARISH.

WAVE LABEL KEY

[W-3/c] Major Impulse/corrective wave	[W-iv] Intermediate Impulse/corrective wave	$20 Fib target zone

CURRENT WAVE POSITION

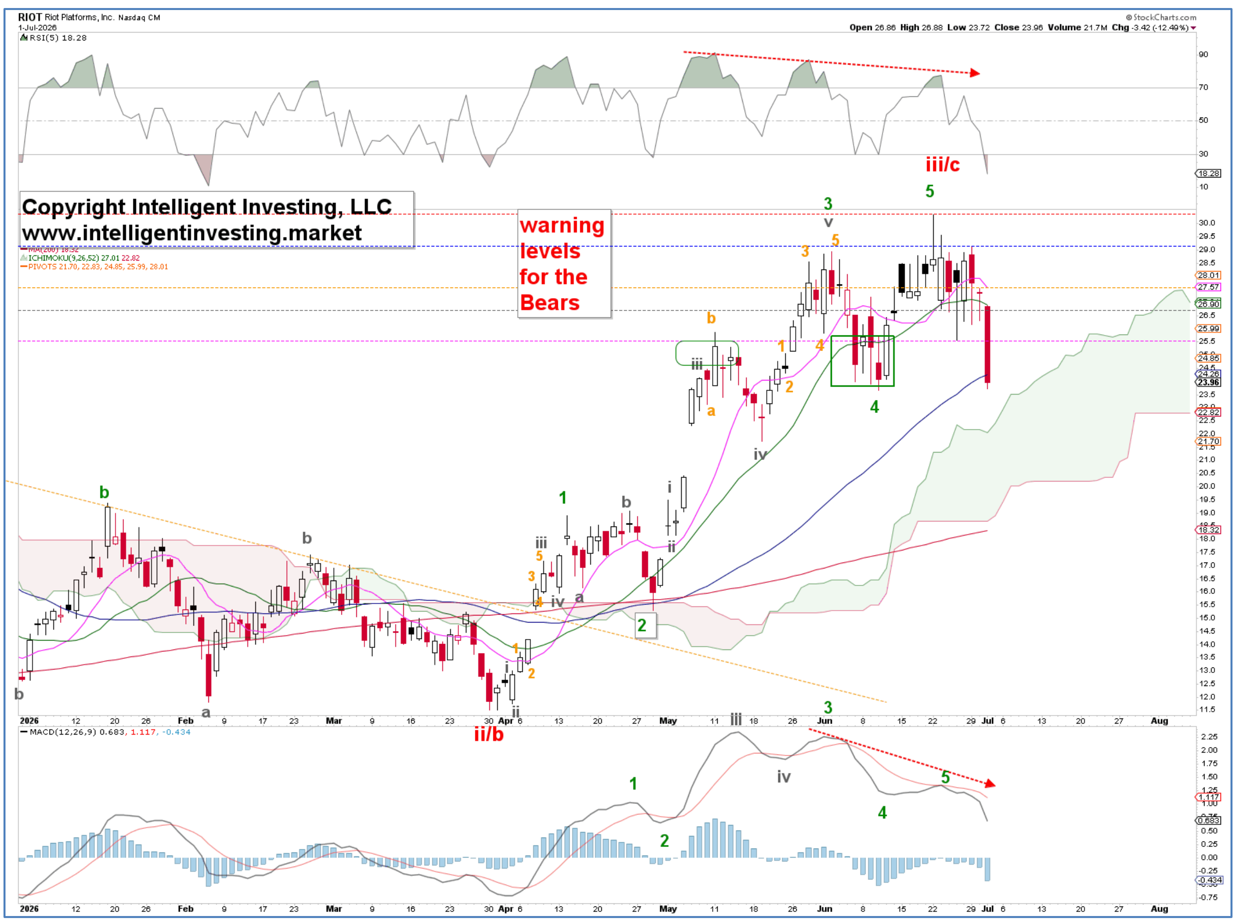
The "EXTENDED W-5 ALTERNATIVE" we presented last week as "a possibility of an extended, subdividing 5th wave," was tossed out the window today, and thus **W-iii/c** has peaked, and at best a **W-iv** is underway

> A larger correction is underway; first target is most likely gap fill at ~$20.

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $25.56	Shot across the bow (40%) $26.63	1st hit Caution (60%) $27.59	2nd hit critical (80%) $29.11	3rd hit, ship sinks (100%) $30.32

Key Finding: The possible subdivision of the W-5 of W-iii/c wave failed today, and thus a larger correction is underway. First logical target is gap fill at $20..



GOLD, MINERS & OIL

GDX Outlook: Long-term (years) BULLISH. Intermediate-term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) NEUTRAL

WAVE LABEL KEY

[W-4]	[W-c]	[W-5]	$71+
Major Impulse wave	Intermediate Impulse wave	Minor Impulse wave	Fib target zone

CURRENT WAVE POSITION

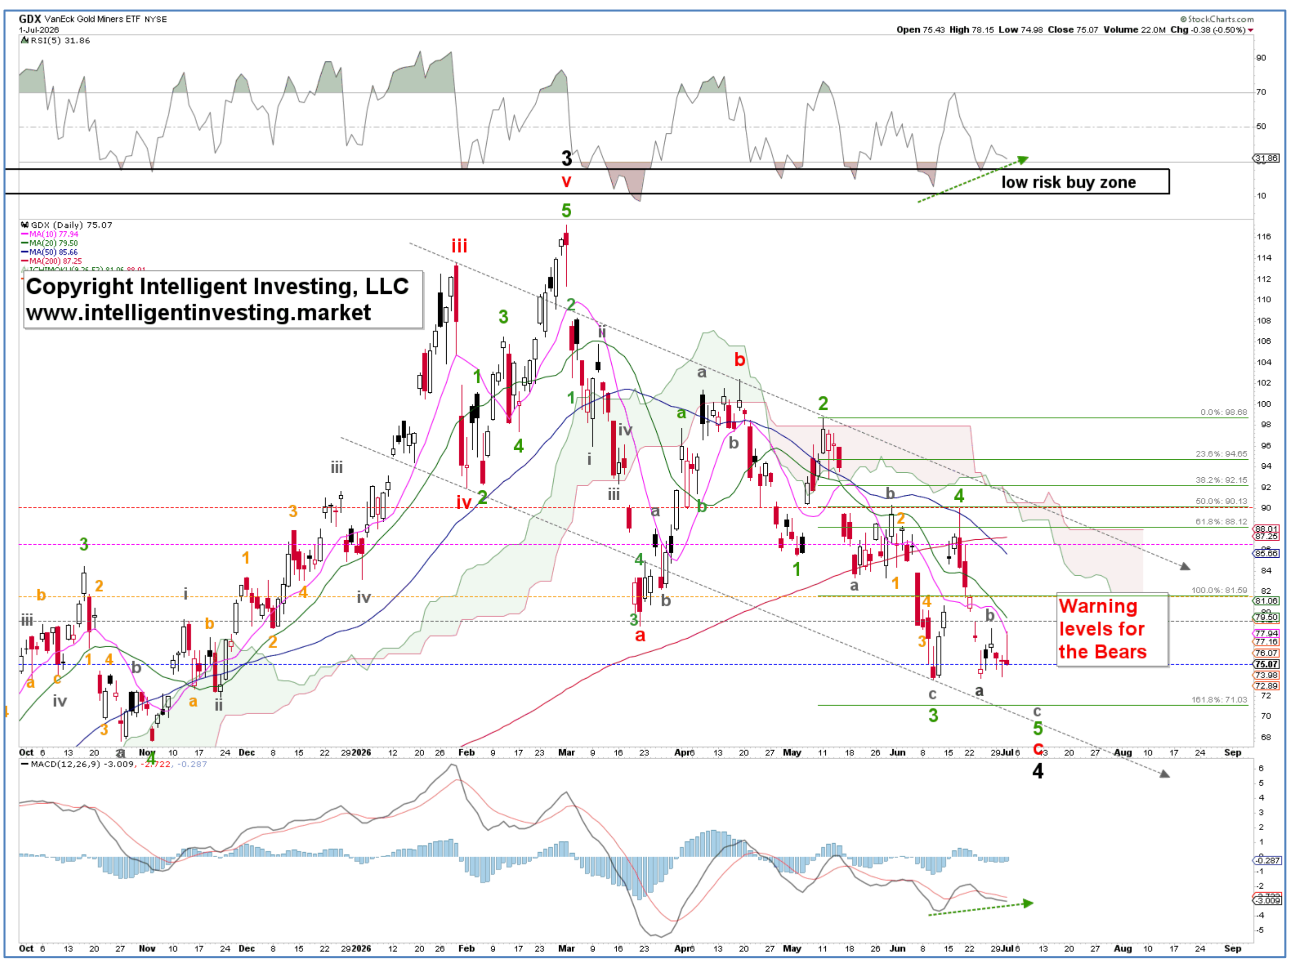
Presenting an **alternative** where **W-c** of **W-4 is** subdividing into five green waves: ideally to $ 71.00.

> **W-4** could extend a little more if W-c is going to subdivide into five smaller waves and not as a double zigzag. Above $81.59 and the chances that the low is in place per our "old" count have increased significantly

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
$75.03	$79.22	$81.59	$86.57	$89.99

Key Finding: W-4 could extend a bit more, ideally to $71 where the 161.80% extension resides, a typical 5th wave target in an ending diagonal. This alternative is presented because **W-c** may be becoming an ending diagonal rather than a double zigzag. Overall, the long-term risk-reward is highly skewed towards reward. Above $81.59 and we can consider the low as in place,



GOLD Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) NEUTRAL

NO CHANGES FROM YESTERDAY

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse wave	[W-i] Minute Impulse wave	$4800+/-100 Fib target zone

CURRENT WAVE POSITION

W-4 could have completed this week right at the ideal target zone, and **W-5** is in its very early stages.

> Sentiment is at historic lows, a contrarian indicator, as since 2008 such washed-out readings always lead to good rallies: https://x.com/sentimentrader/status/2071956928628982237?s=51&t=og5_bFJdNsKNF2655kxwPA

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $4,098	Shot across the bow (40%) $4,305	1st hit Caution (60%) $4,453	2nd hit critical (80%) $4,595	3rd hit, ship sinks (100%) $4,773

Key Finding: GOLD may have wrapped up its final 5th wave of a larger 4th wave, right at the 200% extension ($3959 vs $3970), a typical 5th wave target. The two-day rally so far has been constructive, producing positive divergences (green dotted arrows) that add weight to the evidence that the low is in. A break above $4,453 will go a long way toward confirming the low. Thus, we remain NEUTRAL in the short term.

BRENT/WTIC Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) NEUTRAL. Short term (days) BEARISH.

WAVE LABEL KEY FOR BRENT/WTIC

[W-2/b] Major Corrective wave	[W-c] Intermediate Corrective wave	[W-5] Minor Impulse wave	$68+/-2 / $62+/-2 Fib target zone

CURRENT WAVE POSITION FOR BRENT

W-5 of **W-c** of **W-2/b** should be underway.

> No signs yet that the downside is complete; as such, we look lower and remind ourselves of the alternative (2nd chart) as presented last week!

WARNING LEVELS FOR BRENT: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $80.85	Shot across the bow (40%) $83.86	1st hit Caution (60%) $86.65	2nd hit Critical (80%) $89.59	3rd hit, ship sinks (100%) $94.73

Key Finding: The "…one last **W-4, 5** can't be excluded just yet," path seems to be the most likely, with **W-5** now underway. Overall, still no signs of a bottom, while we do see the technical indicators losing strength and momentum, which supports a waning downtrend. We remain warry of the alternative, which targets $38+/-2. So we'll remain patient until we see bottoming signs, i.e, price breaking above key resistance levels, higher highs and higher lows, etc.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.

REFERAL PROGRAM

Thank you for being a loyal member.

We've simplified our referral program to make it much more rewarding: Share the referral link below with friends, family, or colleagues. When they sign up and become a paid member, you both get 50% off for the two months. The more you refer, the more you save!

Your unique referral links:

***DAILY NEWSLETTER**: https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=7QY6NWS2UN4H8.*

***MONTHLY NEWSLETTER:** https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=JB4CNBDCE292U*

It only takes a few seconds to share. Many of our best long-term members came through personal recommendations from people like you.

If you have any questions, just email us.

Best regards,

Arnout & Team
