TABLE OF CONTENTS

STOCKMARKET

DOW Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) NEUTRAL.

NO CHANGES FROM YESTERDAY.

WAVE LABEL KEY

[W-3] Major Impulse Wave	**[W-c]** Intermediate Corrective wave	**[W-5]** Minor Corrective/Impulse wave	**$$53,500-54,500** Fib target

CURRENT WAVE POSITION

W-5 of **W-c** of **W-3** continues as an ugly ending diagonal.

> The price action since the ATH remains rather discombobulated; i.e., overlapping, see the hourly 2nd chart. This is clearly an ending diagonal (ED), and these are unreliable due to their overlapping abc-abc-abc-abc-abc pattern. Compare the current price action with the even larger ED from Nov. '25 through Febr '26… Similarly confusing. But it looks like W-iii of W-5 is still underway with an ideal target of ~$53,100, etc (see the 2nd chart)

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $52,655	**Shot across the bow (40%) $52,395**	**1st hit Caution (60%) $52,026**	**2nd hit critical (80%) $51,614**	**3rd hit, ship sinks (100%) $51,301**

Key Finding: A clearly defined ending diagonal 5th wave is still underway. The problem with EDs is that they are overlapping, discombobulated advances that don't allow for clear, distinct wave counting, making forecasting less reliable. For now, looks like we need another 3-4-5 sequence to consider this advance as complete.

SOX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) BEARISH.

WAVE LABEL KEY

[W-3] Major Impulse wave	[W-iv] Intermediate corrective wave	[W-c] Minor Corrective wave	[W-c/iii] Minute Impulse wave	[W-3,4,5] Micro Impulse wave	11,800+/-200 Fib target zones

CURRENT WAVE POSITION

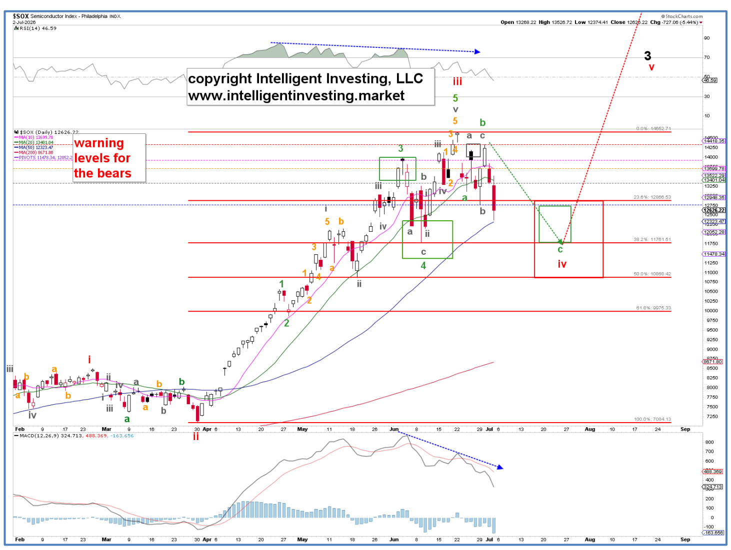
The index should now be in a subdividing W-iii/c to ideally $11,800+/-200, where c/iii=1.236x a/i to 1.382xa/i and where W-5 of W-c/iii is 1.764 to 2.00x 1

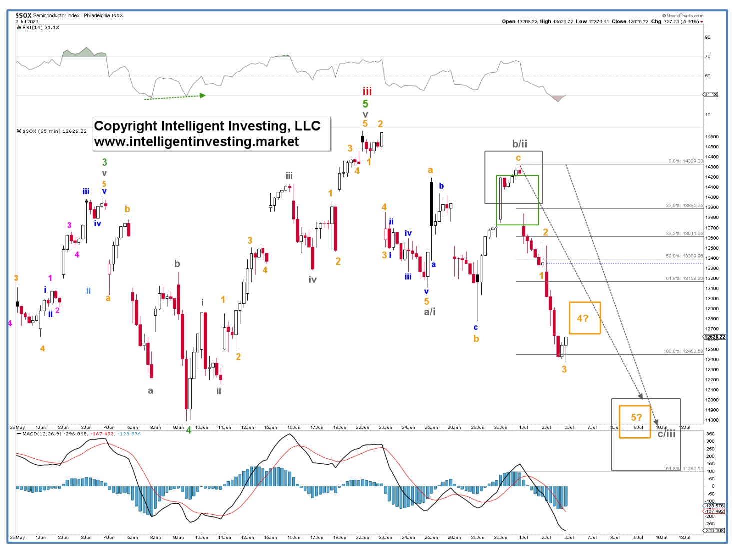
> The “subdividing five waves to ideally $11,760, should be underway,” thesis was correct, although we didn’t get as much of a bounce as we thought we would yesterday (we can’t win ‘em all). But we see confluence around $ 11,800 ± 200 for an important low.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $13,379	Shot across the bow (40%) $13,597	1st hit Caution (60%) $13,965	2nd hit critical (80%) $14,393	3rd hit, ship sinks (100%) $14,655

Key Finding: The recent two-day rally was indeed part of a counter-trend move. While on Tuesday we had no signs a local top was in place, yesterday we “*expect[ed] an impulse-lower pattern,*” which was correct, although the W-2 bounce was much shallower than expected. Typical for a 3rd of a 3rd wave. But we don’t sweat the small stuff, as we keep our eyes on the price: $ 11,800 ± $200.





SPX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) BEARISH.

WAVE LABEL KEY

[W-4] Major Corrective Wave	[W-a] Intermediate Corrective wave	[W-c Minor Corrective wave	[W-b/ii] Minute Impulse wave	7530+/-20 Fib target zone

CURRENT WAVE POSITION

W-b most likely formed a running flat (W-c<b<a), and **W-c** to ideally 7150 should now be underway, contingent on holding below today's high.

> The 2nd option presented yesterday "… *the index holds above yesterday's low for the orange **W-4**, 7450-80, and then rallies above today's high, the **W-4, 5** sequence for **W-c** of **W-b** … is unfolding. It should ideally target 7550-80, with the possibility of as high as 7590*" appears to have been the one, as the index bottomed at around yesterday's close at 7479, rallied today to 7540 today (off by only 10p), and dropped to 7427 today. Thus, we also got the "*A drop below today's low will be a first sign the **W-b** has ended. A drop below Monday's high will then be the 2nd alert for the Bulls*," but not yet the "*a drop below Monday's low is the kill switch*." But, therefore, the Bulls are not yet out of the woods as we can still see 7570-7615 for an extended B-wave. This is only operable on break above today's high.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $7,357	Shot across the bow (40%) $7,440	1st hit caution (60%) $7,530	2nd hit critical (80%) $7,577	3rd hit, ship sinks (100%) $7,620

Key Finding: W-b has likely topped, although we can't exclude one last push to 7570-7615 just yet, since Monday's low hasn't been broken yet. BUT that's our alternative. We now prefer a bounce to around 7500 ± 15, from where the next move lower can start. Note that a v=3.0x i targets approximately the c=a extension at 7,150. Let's see if it can get there!?.

PREFERRED

ALTERNATE

NDX Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) BEARISH.

WAVE LABEL KEY (UNCERTAIN AT THE MOMENT)

[W-4]	[W-c/3]	[W-c/iii]	[W-c]	[W-iv, v?]	$27,460-28,555
Major Wave Corrective Wave	Minor Corrective wave	Minute Impulse wave	Micro Impulse wave	Nano Impulse wave	Fib target zones

CURRENT WAVE POSITION

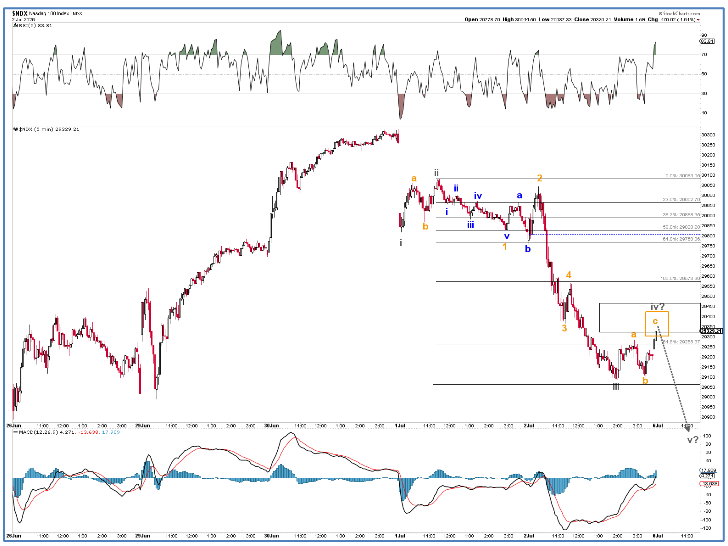
W-c/iii of W-c/3 should be underway.

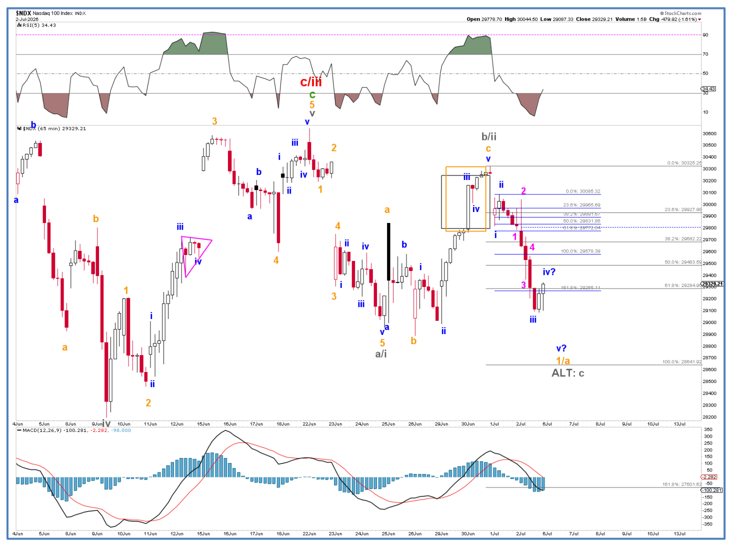
> Although not yet below Monday's low, which is needed to confirm that W-iii/c to ideally $27,460-28,555 is underway, the last two days are pretty bearish, and we go from the 5-minute chart to the daily chart to show that an impulse appears to be underway (the 5-min and 65-min EWP counts align well) with a first target of ideally $28100+/-100.

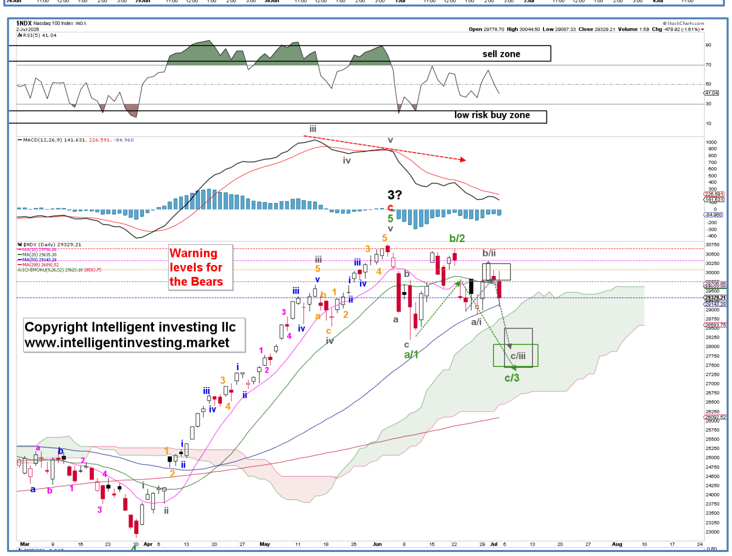
WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
$29,328	$29,748	$30,089	$30,406	$30,642

Key Finding: Current data at hand suggests an impulse lower is underway, that the bounce thus has ended, and that the first downside target is ~$28,100+/-100 with an ultimate ideal downside target of $27,460 as that's where different wave degrees' Fib-extensions overlap (see the lower end of the gray and green target zones on the daily NDX and NAS charts)







SML Outlook: Long-term (years) BULLISH. Intermediate term (months) BEARISH. Mid-term (weeks) BEARISH. Short-term (days) BEARISH.

WAVE LABEL KEY (based on daily chart)

[W-3] Major Degree Impulse wave	[W-iv] Intermediate Impulse wave	[W-a] Minor Impulse wave	[W-a] Minute Impulse wave	[W-1] Micro Impulse wave	$1660+/-20 Fib target zone

CURRENT WAVE POSITION

W-c/iii of **W-3** has most likely ended, and at best **W-iv** to $1660+/-20 is underway; at worst **W-4** to ~$1600.

> The index topped yesterday 6 points above the ideal $1800-1810 target zone we had set a few days prior and has now treated us on two consecutive down days. Thus, most likely **W-c/iii** has topped. But the issue with Ending Diagonals is that due to their overlap, they can always tag on another set of abc if we don't see key price levels taken out below. Thus, the alternative is that we'll see another rally to ~$1880 before all is said and done.

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $1,794	Shot across the bow (40%) $1,780	1st hit caution (60%) $1,765	2nd hit critical (80%) $1,753	3rd hit, ship sinks (100%) $1,722

Key Finding: Most likely **W-c/iii** has topped, and a **W-iv** to $1660+/-20 is underway. The alternative is that we'll see another rally to ~$1880 before all is said and done. That thesis requires a break above this week's high to confirm.

CRYPTO CURRENCIES

BTC Outlook: Long-term (years) BULLISH. Intermediate-term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) BULLISH.

WAVE LABEL KEY

[W-iv] Intermediate Impulse wave	[W-c] Minor Impulse wave	[W-v] Minute Impulse wave	[W-5] Micro Impulse wave	[W-v] Nano Impulse wave	$53-57K Fib target zone

CURRENT WAVE POSITION

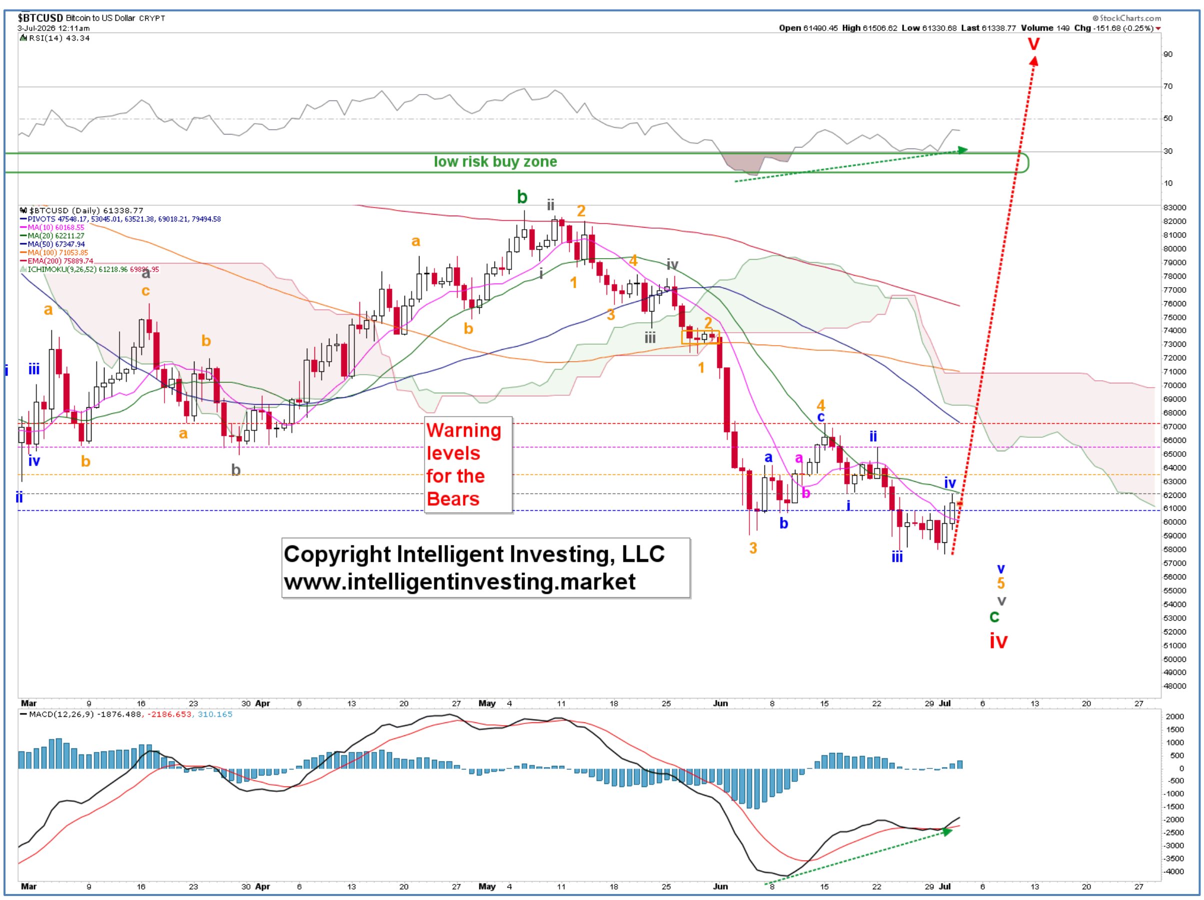
We can still allow for one last W-v of W-5 to ideally $53-57K, unless $62,191 is broken.

> Going to play devil's advocate in that one last W-v is still possible. It's not necessary, but possible. A move above $62,191 (the W-i low) will make this already nearly impossible. .

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $60,992	Shot across the bow (40%) $62,191	1st hit Caution (60%) $63,541	2nd hit critical (80%) $65,555	3rd hit, ship sinks (100%) $67,256

Key Finding: We can still allow for that last 5th wave, but above $62,191 and we can write this "devil's advocate" option off. Our preferred view remains that (W-v) to new ATHs is getting started.



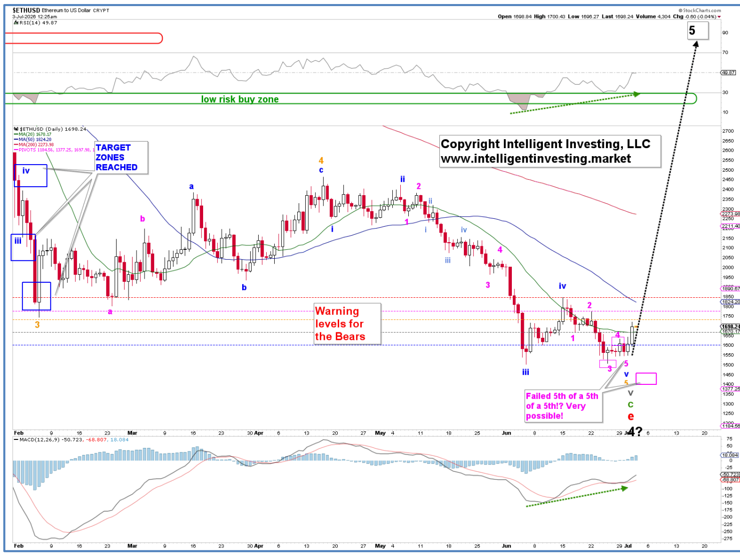
ETH Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks)

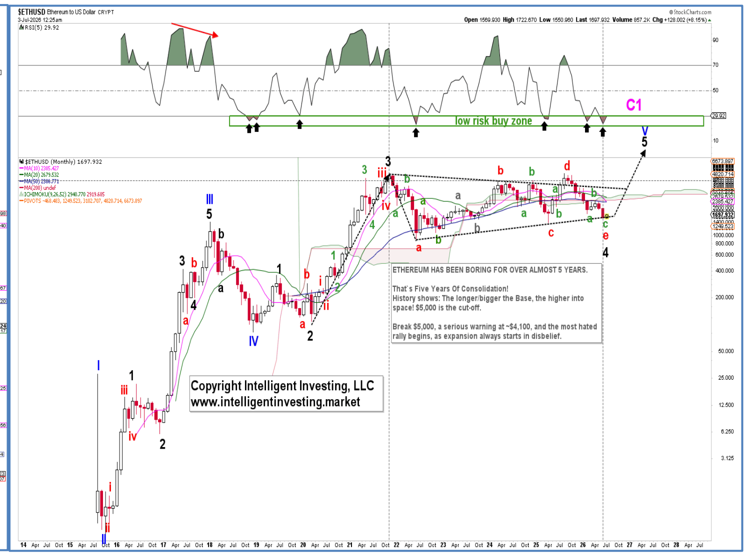
BULLISH. Short-term (days) BULLISH.

Keeping it short, simple and a little different today: our most recent insights, no surprises to you, are available here:

https://www.investing.com/analysis/ethereum-nears-major-low-as-elliott-wave-count-points-to-reversal-potential-200683249

Charts used in article are straight forward and self-evident





RIOT Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) BEARISH.

WAVE LABEL KEY

[W-3/c] Major Impulse/corrective wave	[W-iv] Intermediate Impulse/corrective wave	$20 Fib target zone

CURRENT WAVE POSITION

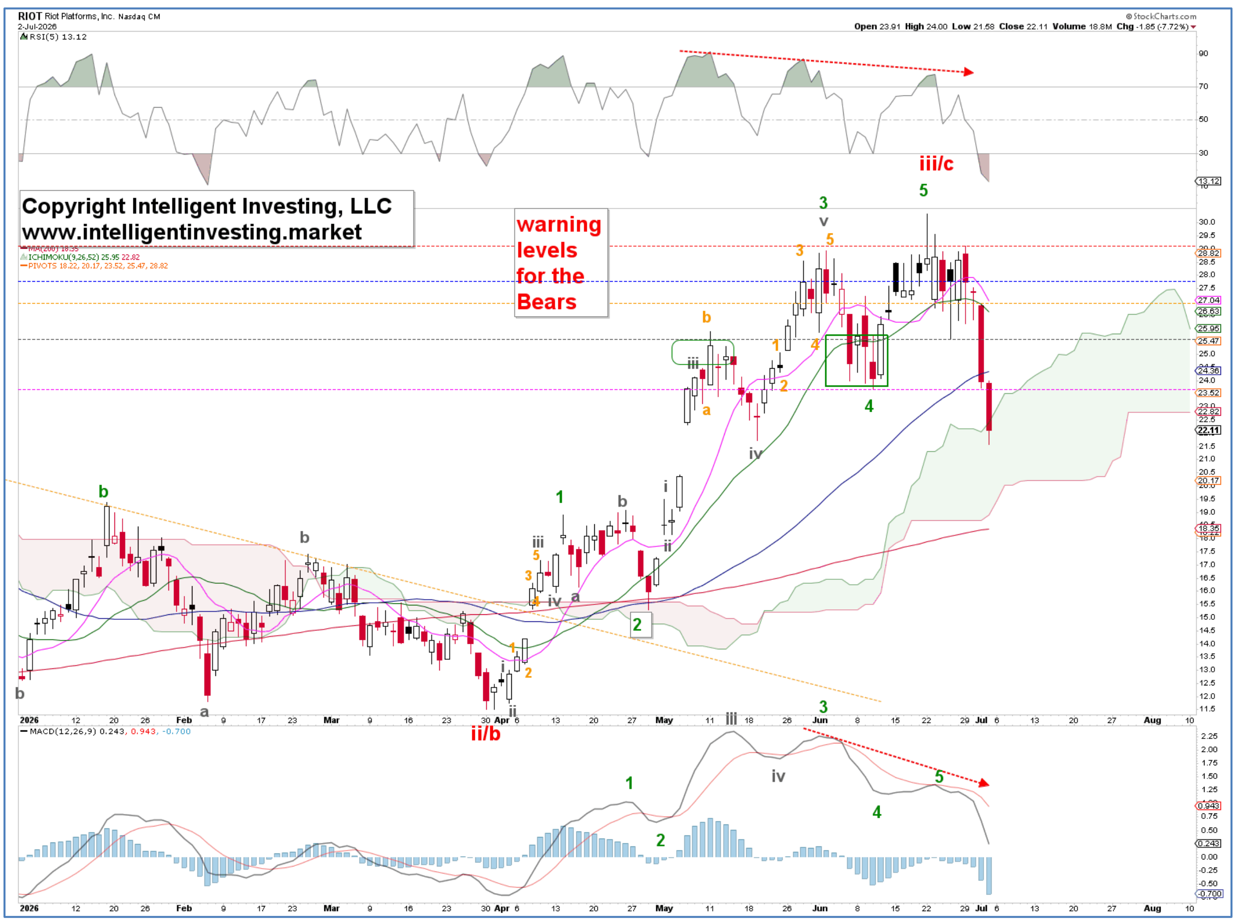
W-iii/c has peaked, and at best a **W-iv** is underway. Possibly, a larger countertrend rally has ended.

> A larger correction is underway; first target is most likely gap fill at ~$20.

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $23.66	Shot across the bow (40%) $25.56	1st hit Caution (60%) $26.88	2nd hit critical (80%) $27.75	3rd hit, ship sinks (100%) $29.11

Key Finding: A larger correction, ideally **W-iv**, is underway. First logical target is gap fill at $20. Below $11.50 means a larger counter trend rally has ended and we'll see single digits again



GOLD, MINERS & OIL

GDX Outlook: Long-term (years) BULLISH. Intermediate-term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) BULLISH.

WAVE LABEL KEY

[W-5]	[W-i]	[W-1]	[W-i]	$90-100
Major Impulse wave	Intermediate Impulse wave	Minor Impulse wave	Minute Impulse wave	Fib target zone

CURRENT WAVE POSITION

Presenting our preferred view (low is in) and the **alternative** where **W-c** of **W-4** is subdividing into five green waves: ideally to $71.00.

> **W-4** could extend a little more if **W-c** subdivides into five smaller waves rather than as a double zigzag, which is our preferred POV. Above $81.59, the chances that the low is in place per our preferred count will increase significantly; we will then look for $90-100 for a 1st wave top.

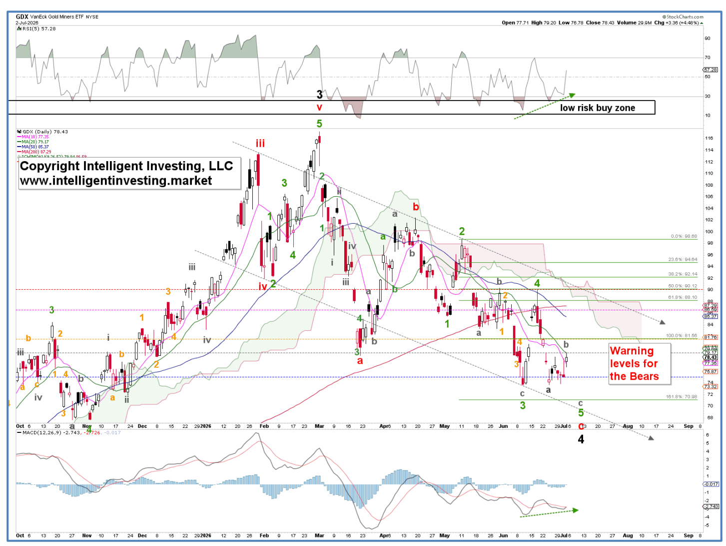
WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
$75.03	$79.22	$81.59	$86.57	$89.99

Key Finding: **W-4** could extend a bit more, ideally to $71, where the 161.80% extension lies, a typical 5th-wave target in an ending diagonal. This alternative is presented because **W-c** may be becoming an ending diagonal rather than a double zigzag. Overall, the long-term risk-reward is highly skewed towards reward. Above $81.59, we can consider the low as in place, and focus only on our preferred EWP count.

PREFERRED

ALTERNATE



GOLD Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) BULLISH. Short-term (days) NEUTRAL

NO CHANGES FROM YESTERDAY

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse wave	[W-i] Minute Impulse wave	$4800+/-100 Fib target zone

CURRENT WAVE POSITION

***W-4** could have completed this week right at the ideal target zone, and **W-5** is in its very early stages.*

> *Sentiment is at historic lows, a contrarian indicator, as since 2008 such washed-out readings always lead to good rallies: https://x.com/sentimentrader/status/2071956928628982237?s=51&t=og5_bFJdNsKNF2655kxwPA*

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $4,098	Shot across the bow (40%) $4,305	1st hit Caution (60%) $4,453	2nd hit critical (80%) $4,595	3rd hit, ship sinks (100%) $4,773

***Key Finding:** GOLD may have wrapped up its final 5th wave of a larger 4th wave, right at the 200% extension ($3959 vs $3970), a typical 5th wave target. The two-day rally so far has been constructive, producing positive divergences (green dotted arrows) that add weight to the evidence that the low is in. A break above $4,453 will go a long way toward confirming the low. Thus, we remain NEUTRAL in the short term.*

BRENT/WTIC Outlook: Long-term (years) BULLISH. Intermediate term (months) BULLISH. Mid-term (weeks) NEUTRAL. Short term (days) BEARISH.

WAVE LABEL KEY FOR BRENT/WTIC

[W-2/b] Major Corrective wave	[W-c] Intermediate Corrective wave	[W-5] Minor Impulse wave	$68+/-2 / $62+/-2 Fib target zone

CURRENT WAVE POSITION FOR BRENT

W-5 of **W-c** of **W-2/b** could have bottomed, as there are enough waves in place to consider the move from the May **W-b** high as complete.

> No signs yet that the downside is complete; as such, we look lower and remind ourselves of the alternative (2nd chart) as presented last week!

WARNING LEVELS FOR BRENT: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $80.85	Shot across the bow (40%) $83.86	1st hit Caution (60%) $86.65	2nd hit Critical (80%) $89.59	3rd hit, ship sinks (100%) $94.73

Key Finding: The **W-5** may have ended today. But there are still no signs of a bottom, as no key price levels to the upside have been broken, while we do see the technical indicators losing strength and momentum, *i.e.*, positive divergence, which supports a waning downtrend. We remain wary of the alternative, which targets $38+/-2 for BRENT. So we'll remain patient until we see bottoming signs, i.e, price breaking above key resistance levels, higher highs and higher lows, etc.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
