TABLE OF CONTENTS

STOCKMARKET

DOW JONES INDUSTRIAL AVERAGE (DOW)

NO CHANGES FROM THURSDAY: ENDING DIAGONAL CONTINUES.

WAVE LABEL KEY

[W-3] *Major* *Impulse Wave*	***[W-c]*** *Intermediate* *Corrective wave*	***[W-5]*** *Minor* *Corrective/Impulse wave*	***$$53,500-54,500*** *Fib target*

CURRENT WAVE POSITION

W-5 *of* ***W-c*** *of* ***W-3*** *continues as an ugly ending diagonal.*

> *The price action since the ATH remains rather discombobulated; i.e., overlapping, see the hourly 2nd chart. This is clearly an ending diagonal (ED), and these are unreliable due to their overlapping abc-abc-abc-abc-abc pattern. Compare the current price action with the even larger ED from Nov. '25 through Febr '26… Similarly confusing. But it looks like W-iii of W-5 is still underway with an ideal target of ~$53,100, etc (see the 2nd chart)*

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) ***$52,655***	***Shot across the bow (40%)*** ***$52,395***	***1st hit Caution (60%)*** ***$52,026***	***2nd hit critical (80%)*** ***$51,614***	***3rd hit, ship sinks (100%)*** ***$51,301***

Key Finding: *A clearly defined ending diagonal 5th wave is still underway. The problem with EDs is that they are overlapping, discombobulated advances that don't allow for clear, distinct wave counting, making forecasting less reliable. For now, looks like we need another 3-4-5 sequence to consider this advance as complete.*

SEMICONDUCTOR INDEX (SOX)

WAVE LABEL KEY

[W-3] Major Impulse wave	[W-iv] Intermediate corrective wave	[W-c] Minor Corrective wave	[W-c/iii] Minute Impulse wave	[W-3,4,5] Micro Impulse wave	11,800+/-200 Fib target zones

CURRENT WAVE POSITION

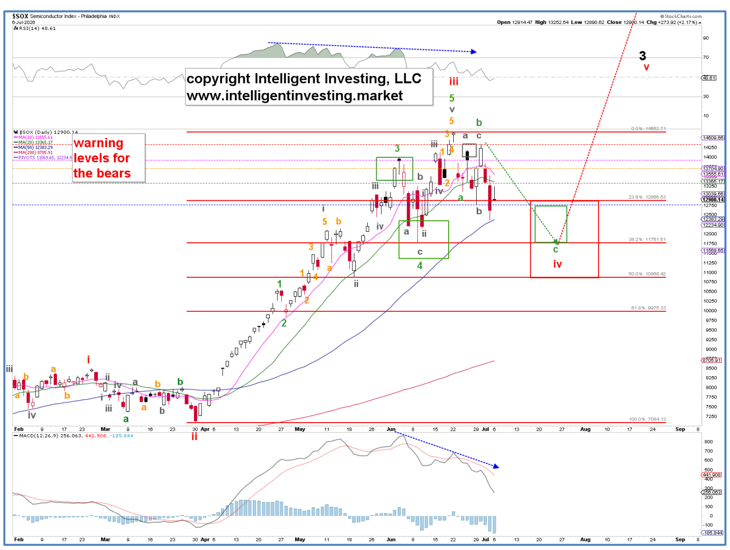
The index should now be in a subdividing W-iii/c to ideally $11,800+/-200, where c/iii=1.236x a/i to 1.382xa/i and where W-5 of W-c/iii is 1.764 to 2.00x 1

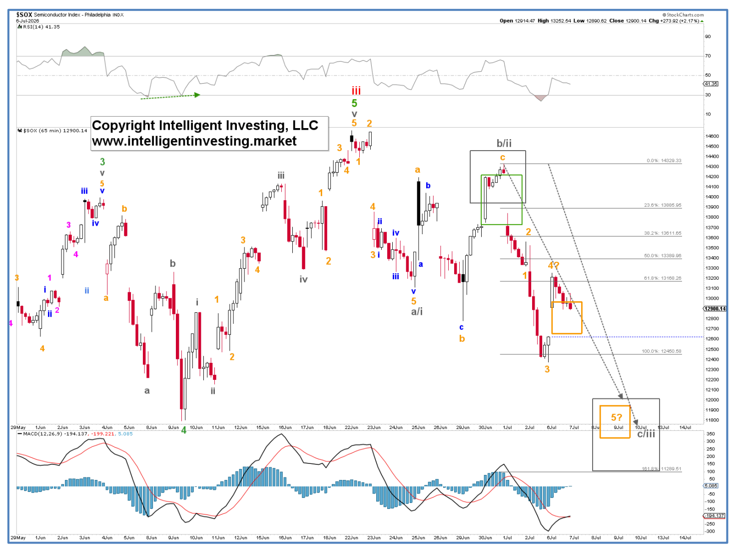
> On Thursday, we were looking higher for a 4th wave higher, followed by a 5th wave lower. Although we got a bit of an overshoot today, 13252 vs 12970, there's no invalidation yet for this count, but we may have to refer to the NDX's count (see page 6). Thus, for now we leave things as is, while acknowledging that the W-c/iii (see the NDX) may morph into an ending diagonal, which is not uncommon for a C-wave. For now, no confirmation, but it is brought to our attention by the markets, so to speak.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $13,379	Shot across the bow (40%) $13,597	1st hit Caution (60%) $13,965	2nd hit critical (80%) $14,393	3rd hit, ship sinks (100%) $14,655

Key Finding: W-c/iii may morph into an ending diagonal:1-2-3-4-5 (abc-abc-abc-abc), where Thursday's was W-1, now in W-2, etc. But we have no confirmation yet for this pattern, so we stick to our preferred wave count as shown in the 2nd chart until proven otherwise.





WAVE LABEL KEY

[W-4] Major Corrective Wave	[W-a] Intermediate Corrective wave	[W-c Minor Corrective wave	[W-c] Minute Impulse wave	[W-5] Micro Impulse wave	7530+/-20 Fib target zone

CURRENT WAVE POSITION

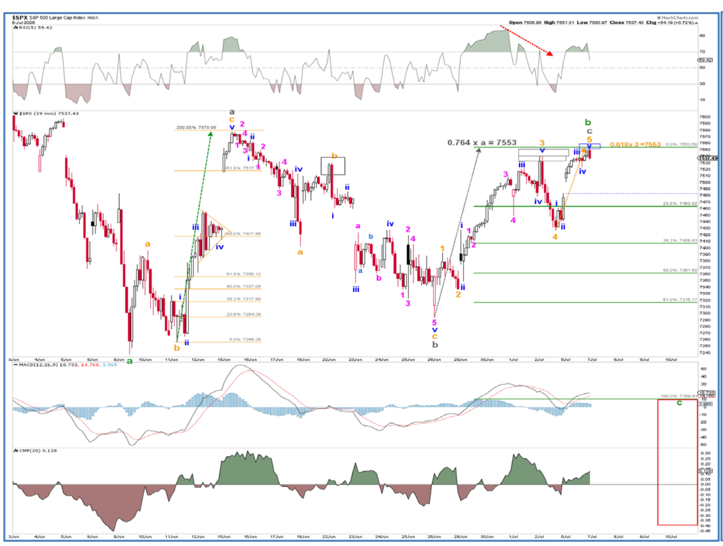
The alternative presented on Thursday proved operable as the index broke above Thursday's high today: a W-4, 5 setup. The c=0.764x a and 5=0.618x 3 extensions both target 7553, which was achieved today with a high of 7551. C-waves often are 0.618 to 1.0x a, sometimes more.

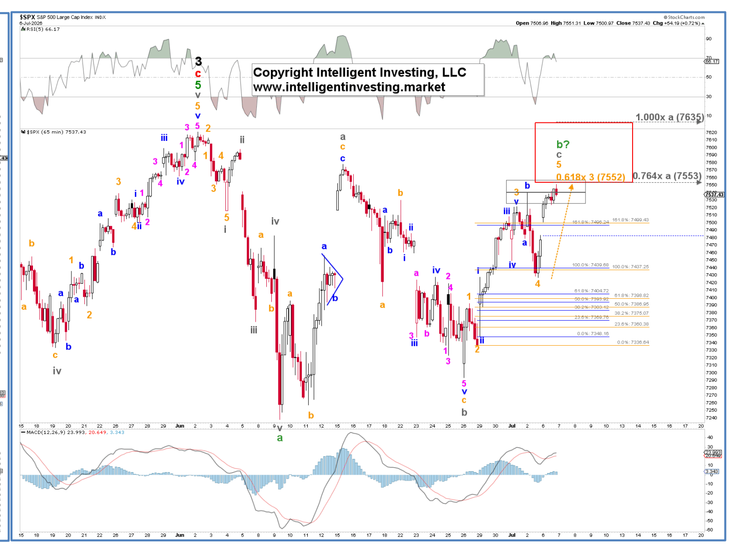
> As said on Thursday, "*But, …, the Bears are not yet out of the woods, as we can still see 7570-7615 for an extended B-wave. This is only operable on a break above today's high.*" This break higher happened, but 7570-7615 may not be reached as we can count five waves from Thursday's low to today's high as well as five waves up from the June 26 low.
>
> The index reversed from the c=0.764x a and 0.618x 3 extensions at 7553. Now it needs to drop below Thursday's low to confirm a local top is in place, with W-c confirmed below the June 26 low.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $7,357	Shot across the bow (40%) $7,440	1st hit caution (60%) $7,530	2nd hit critical (80%) $7,577	3rd hit, ship sinks (100%) $7,620

Key Finding: Although we looked for higher prices on Thursday (*a bounce to around 7500 ± 15, from which the next move lower could start*), we got more than we asked for, as the index tagged 7551. However, it appears that a five-wave move from Thursday's low and from the June 26 low was completed today. Thus, we should expect at least a partial retrace (7390+/-20), and the most bearish scenario sees a drop to ~7170, with a first sign of that on a move below today's low. The Bears don't want to see a series of higher lows and higher highs, as that can target 7635 to even 7765. More about that only on a break above the 7620 ATH.





WAVE LABEL KEY (UNCERTAIN AT THE MOMENT)

[W-4] Major Wave Corrective Wave	[W-c] Minor Corrective wave	[W-c] Minute Impulse wave	[W-c/3] Micro Impulse wave	$27,460-28,555 Fib target zones

CURRENT WAVE POSITION

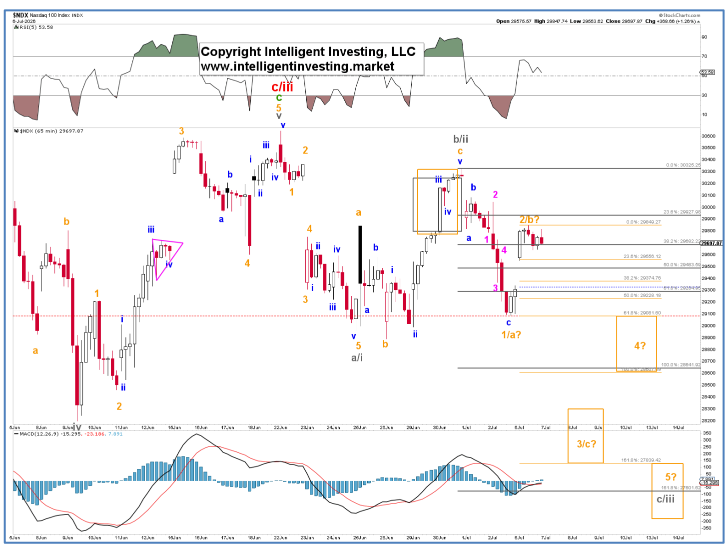
W-c/iii of W-c/3 should be underway but is likely subdividing into an overlapping ending diagonal and not in a standard five wave impulse.

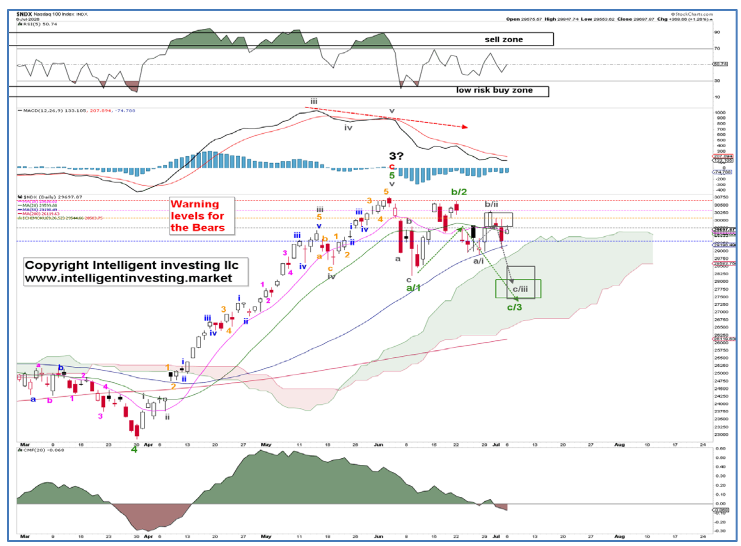
> On Thursday it "*appears an impulse is underway (the 5-min and 65-min EWP counts align well) with a first target of ideally $28100+/-100.*" That failed to materialize, making our lives less easy… of course… thanks Mr. market… and now, with this overlapping price action of late, our best interpretation is that of an ending diagonal C-wave.

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $29,328	Shot across the bow (40%) $29,748	1st hit caution (60%) $30,089	2nd hit critical (80%) $30,406	3rd hit, ship sinks (100%) $30,642

Key Finding: Thursday the data at hand suggested an impulse lower is underway, but although we were looking for a small bounce higher, today the index invalidated that option, leaving the bears with at best an ending diagonal C-wave: 1-2-3-4-5 (abc-abc-abc-abc-abc), which will be an overlapping downward move. This is the best interpretation of the recent price action we can provide, as sideways overlapping slop like now always leaves a lot to be desired. Remember, the short term is always the most variable, and during corrections we must expect the unexpected and be comfortable with changing perspectives often. Nothing we can do about.





SMALL CAPS (SML)

NO CHANGES FROM THURSDAY: ENDING DIAGONAL MAY HAVE ENDED, AS SMALL CAPS ARE NOW LAGGING THE DOW JONES.

WAVE LABEL KEY (based on daily chart)

[W-3] Major Degree Impulse wave	***[W-iv]*** Intermediate Impulse wave	***[W-a]*** Minor Impulse wave	***[W-a]*** Minute Impulse wave	***[W-1]*** Micro Impulse wave	***$1660+/-20*** Fib target zone

CURRENT WAVE POSITION

W-c/iii *of* ***W-3*** *has most likely ended, and at best* ***W-iv*** *to $1660+/-20 is underway; at worst* ***W-4*** *to ~$1600.*

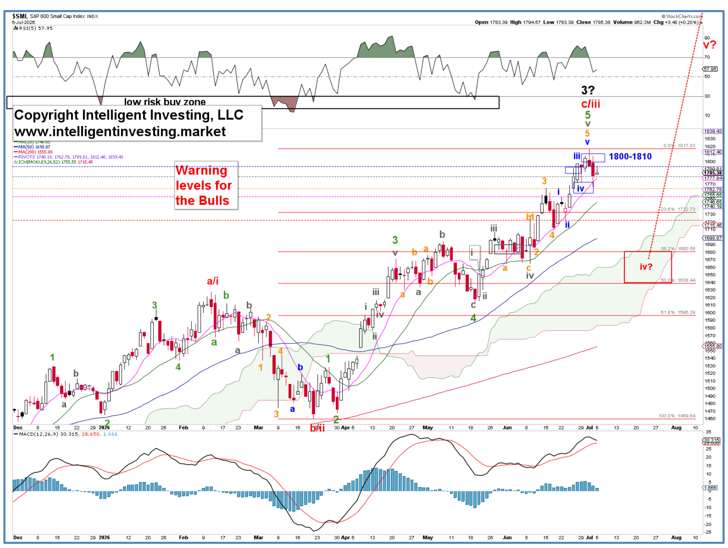
> *The index topped yesterday 6 points above the ideal $1800-1810 target zone we had set a few days prior and has now treated us on two consecutive down days. Thus, most likely* ***W-c/iii*** *has topped. But the issue with Ending Diagonals is that due to their overlap, they can always tag on another set of abc if we don't see key price levels taken out below. Thus, the alternative is that we'll see another rally to ~$1880 before all is said and done.*

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $1,794	***Shot across the bow (40%) $1,780***	***1st hit caution (60%) $1,765***	***2nd hit critical (80%) $1,753***	***3rd hit, ship sinks (100%) $1,722***

Key Finding: *Most likely* ***W-c/iii*** *has topped, and a* ***W-iv*** *to $1660+/-20 is underway. The alternative is that we'll see another rally to ~$1880 before all is said and done. That thesis requires a break above this week's high to confirm.*

PREFERRED



ALTERNATE

CRYPTO CURRENCIES

BITCOIN (BTC)

WAVE LABEL KEY

[W-v] Intermediate Impulse wave	[W-1] Minor Impulse wave	[W-i] Minute Impulse wave	$164-337K Fib target zone

CURRENT WAVE POSITION

$62,191 broke, so no final 5th and thus back to the preferred POV: W-i if W-1 of W-v should be underway. First target, the 50d SMA =~$65K

> On Thursday we played devil's advocate one last time, but the BTC Bulls ran with it, broke price above $62,191, and thus our preferred view remains that a longer-lasting bottom is in place. As such, we now present the warning levels for the Bulls

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $63,110	Shot across the bow (40%) $62,545	1st hit Caution (60%) $61,490	2nd hit critical (80%) $59,971	3rd hit, ship sinks (100%) $57,739

Key Finding: Our preferred view remains that (W-v) to new ATHs is getting started with a first wave underway. We now present warning levels for the Bulls as there's enough upside since last week's low to set reasonable expectations.

ETHEREUM (ETH)

WAVE LABEL KEY

[W-5] Major Impulse Wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse wave	[W-i] Minute Impulse wave	$5000+ Fib target zone

CURRENT WAVE POSITION

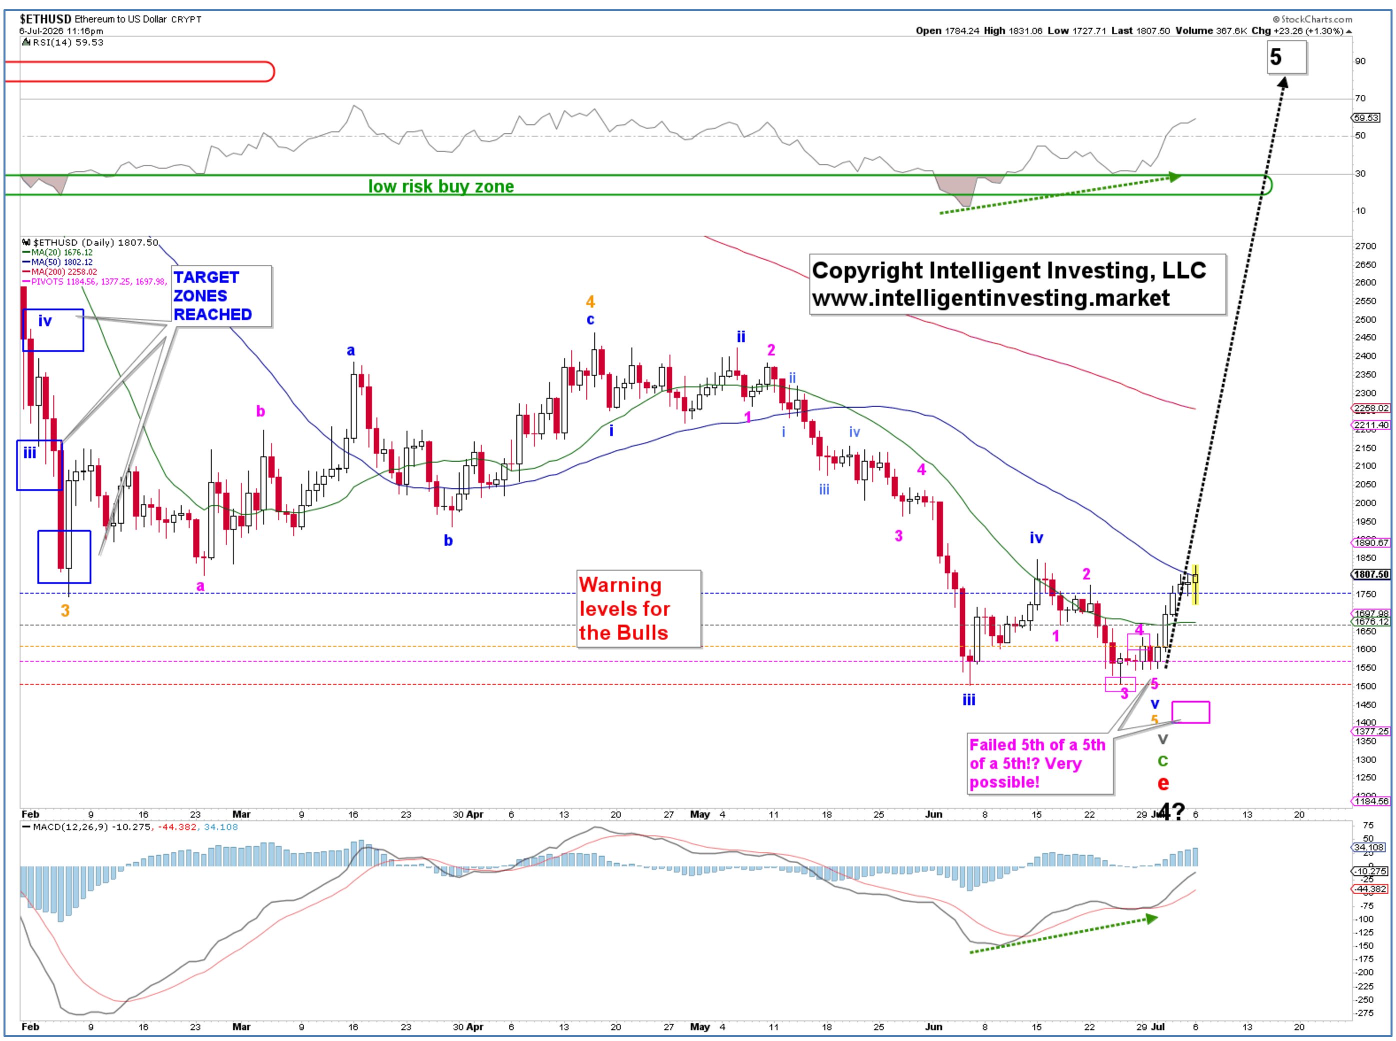
W-i if **W-1** of **W-i** of **W-5** should be underway. First target: the 50d SMA = ~$ 2050 ± 50.

> On Thursday, we presented our Bullish perspective in more detail, and ETH has not disappointed, moving higher. It is sitting right at the 50d SMA, and a break above it can target the 200d SMA. Since the upside is considerable, we can now add the warning levels for the Bulls

WARNING LEVELS: percentages (%) indicate the chance the uptrend is over.

Radar lock (20%) $1,756	Shot across the bow (40%) $1,669	1st hit Caution (60%) $1,608	2nd hit critical (80%) $1,569	3rd hit, ship sinks (100%) $1,510

Key Finding: The large impulse (**W-5**) to new ATHs should be in its early stages, and we remain bullish unless last week's low is broken. We now present warning levels for the Bulls as there's enough upside since last week's low to set reasonable expectations



GOLD, MINERS & OIL

GOLD MINERS (GDX)

No changes since Thursday

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse wave	[W-i] Minute Impulse wave	$90-100 Fib target zone

CURRENT WAVE POSITION

*Presenting our preferred view (low is in) and the **alternative** where **W-c** of **W-4** is subdividing into five green waves: ideally to $71.00.*

> ***W-4** could extend a little more if **W-c** subdivides into five smaller waves rather than as a double zigzag, which is our preferred POV. Above $81.59, the chances that the low is in place per our preferred count will increase significantly; we will then look for $90-100 for a 1st wave top.*

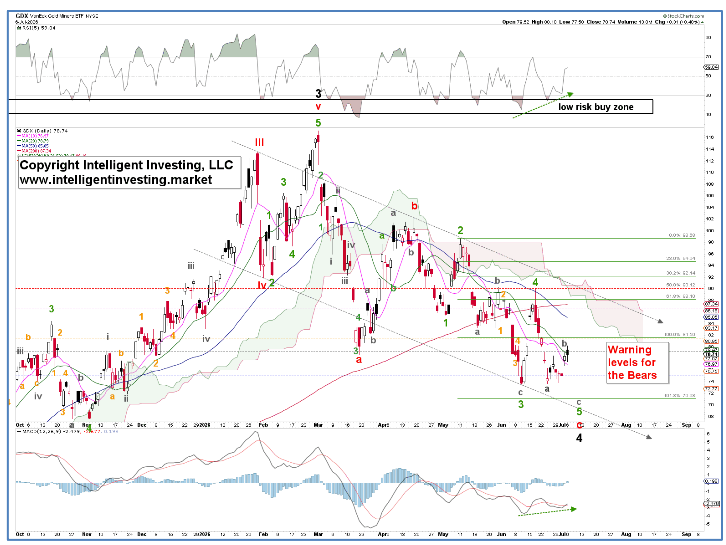
WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $75.03	Shot across the bow (40%) $79.22	1st hit Caution (60%) $81.59	2nd hit critical (80%) $86.57	3rd hit, ship sinks (100%) $89.99

Key Finding: ***W-4** could extend a bit more, ideally to $71, where the 161.80% extension lies, a typical 5th-wave target in an ending diagonal. This alternative is presented because **W-c** may be becoming an ending diagonal rather than a double zigzag. Overall, the long-term risk-reward is highly skewed towards reward. Above $81.59, we can consider the low as in place, and focus only on our preferred EWP count.*

PREFERRED

ALTERNATE



GOLD (GLD)

No changes from Thursday

WAVE LABEL KEY

[W-5] *Major Impulse wave*	***[W-i]*** *Intermediate Impulse wave*	***[W-1]*** *Minor Impulse wave*	***[W-i]*** *Minute Impulse wave*	***$4800+/-100*** *Fib target zone*

CURRENT WAVE POSITION

***W-4** could have completed this week right at the ideal target zone, and **W-5** is in its very early stages.*

> *Sentiment is at historic lows, a contrarian indicator, as since 2008 such washed-out readings always lead to good rallies: https://x.com/sentimentrader/status/2071956928628982237?s=51&t=og5_bFJdNsKNF2655kxwPA*

WARNING LEVELS: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $4,098	***Shot across the bow (40%) $4,305***	***1st hit Caution (60%) $4,453***	***2nd hit critical (80%) $4,595***	***3rd hit, ship sinks (100%) $4,773***

Key Finding: *GOLD may have wrapped up its final 5th wave of a larger 4th wave, right at the 200% extension ($3959 vs $3970), a typical 5th wave target. The two-day rally so far has been constructive, producing positive divergences (green dotted arrows) that add weight to the evidence that the low is in. A break above $4,453 will go a long way toward confirming the low. Thus, we remain NEUTRAL in the short term.*

BRENT/WTIC (OIL, UCO, USO).

No changes since Thursday

WAVE LABEL KEY FOR BRENT/WTIC

[W-2/b]	[W-c]	[W-5]	$68+/-2 / $62+/-2
Major Corrective wave	Intermediate Corrective wave	Minor Impulse wave	Fib target zone

CURRENT WAVE POSITION FOR BRENT

*W-5 of W-c of **W-2/b** could have bottomed, as there are enough waves in place to consider the move from the May W-b high as complete.*

> *No signs yet that the downside is complete; as such, we look lower and remind ourselves of the alternative (2nd chart) as presented last week!*

WARNING LEVELS FOR BRENT: percentages (%) indicate the chance the downtrend is over.

Radar lock (20%) $80.85	Shot across the bow (40%) $83.86	1st hit Caution (60%) $86.65	2nd hit Critical (80%) $89.59	3rd hit, ship sinks (100%) $94.73

Key Finding: *The W-5 may have ended today. But there are still no signs of a bottom, as no key price levels to the upside have been broken, while we do see the technical indicators losing strength and momentum, i.e., positive divergence, which supports a waning downtrend. We remain wary of the alternative, which targets $38+/-2 for BRENT. So we'll remain patient until we see bottoming signs, i.e, price breaking above key resistance levels, higher highs and higher lows, etc.*

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
