JOIN ME ON PEAKBOT*

Trade what I trade, without lifting a finger, by connecting your brokerage account through [PeakBot](#) to my account: <https://peakbot.com/intelligent-investing-bot/>. **Starting at \$197/month.**

I [returned over 100% \(\\$10,000\) within three months](#), primarily using SPY options. I am committed to providing this type of cash flow, regardless of market conditions, as I trade both the long and short sides through intermediate-dated SPY calls and puts (~6-8 weeks out) using my own Elliott Wave work exclusively!

My goal is to make ~\$100/day, which is ~\$500/week, and ~\$2000/month, knowing well that not all market environments are conducive to such returns.

My strategy gives the market time to validate my Elliott Wave thesis and avoids being a victim of options' time decay (theta) when wrong. I trade at most 3x per day; positions are rarely >50% of my portfolio; I average down at most 2x (e.g., at the 3rd and 5th waves); and I hedge-trade around a core position if necessary (e.g., at the 2nd and 4th waves). Most trades are swing- or intra-day.

Requirements:

- \$10K investment minimum
- Tradier, Schwab, or Tasty Trade account

STOCKMARKET

DOW JONES INDUSTRIAL AVERAGE (DOW)

Outlook: Medium term (weeks to ~6 months) **BEARISH**. Short-term (days to ~4 weeks) **BEARISH**.

WAVE LABEL KEY BEARISH RESOLUTION

[W-4] Major Corrective Wave	[W-a] Intermediate Corrective	[W-a] Minor Corrective	[W-c]? Minute Corrective	\$50,900-51,700 Fib targets
--	--	-------------------------------------	---------------------------------------	---------------------------------------

CURRENT WAVE POSITION

W-5 of **W-c** of **W-3** has likely completed as an ending diagonal.

While the short-term (hours to days) is still confusingly overlapping, bigger picture-wise, which is always cleaner, there are enough waves in place, right in the ideal target zone, to consider W-3 as complete. A break below \$49,909 (last month's low) will go a long way to confirm **W-4**.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: **W-3** has likely topped, and a break below last month's low on the monthly time frame will help confirm this thesis. Besides, the monthly RSI5 is now sufficiently overbought to warrant a top, as during early 2026, fall 2024, summer 2021 (vertical dotted lines). While ~\$54,820 can't be excluded yet, the risk/reward is certainly skewed towards risk at this stage.

S&P500 (SPX)

Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~4 weeks) BEARISH

WAVE LABEL KEY: BEARISH RESOLUTION

[W-4] Major Impulse Wave	[W-A] Intermediate Corrective wave	[W-c/3] Minor Impulse	[W-i, ii, iii, iv, v] Minute Impulse	\$7120 Fib targets
---------------------------------------	---	------------------------------------	---	---------------------------------

CURRENT WAVE POSITION

W-c/3 of **W-a** of **W-4** should be underway with a subdividing five-wave structure developing.

Finally, a breakdown from the range, and a close below the 10, 20, and 50d SMA, with the indicators (starting to) point down. While the futures (ES_F) count like a clean five waves lower from this week's high, cash doesn't (yet). So we can allow for either a full impulse to develop in cash as well (2nd chart), or we are dealing with a leading diagonal 1st wave (3rd chart). In the former case, we'll see a more direct break above today's high targeting ~\$7,520+/-20 before **W-iii** kicks in. In the latter case, we may see a few more smaller 4th and 5th waves first before **W-i** completes.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

Radars lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
-----------------------------	-------------------------------------	--	---	---

Key Finding: As stated yesterday, "a break below \$7,421 is required to target the \$7,120 level." The index bottomed at \$7,431 today, so we are not 100% certain yet, but it is now below its 10-, 20-, and 50-day SMAs. Besides, the futures count as five down from Wednesday's high to today's low. Thus, we are tracking the completion of a 1st wave of a c-wave, which comprises five waves to ideally ~\$7,120+/-100.

SEMICONDUCTOR INDEX (SOX)
Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~4 weeks) BEARISH.

WAVE LABEL KEY

[W-3] Major Impulse wave	[W-iv] Intermediate corrective wave	[W-a] Minor Corrective	[W-v] Minute Impulse	[W-c] Micro Impulse	~\$10,750+/-250 Fib target zone
--------------------------------	---	------------------------------	----------------------------	---------------------------	------------------------------------

CURRENT WAVE POSITION

W-a of W-iv continues to subdivide and is getting closer to the ideal downside target zone 😊

The index is in a leading diagonal W-a of W-iv, ideally \$10,750+/-250, from which a larger bounce can materialize. Either the diagonal has ended, or we see one more 4th-5th wave subdivision before a larger bounce can start (W-b).

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

Radars lock (20%)	Shot across the bow (40%)	1 st hit Caution (60%)	2 nd hit critical (80%)	3 rd hit, ship sinks (100%)
----------------------	------------------------------	--------------------------------------	---------------------------------------	---

Key Finding: W-a is morphing in a leading diagonal, which could have ended today, or we'll see one more W-4, 5 sequence before a larger bounce should materialize. Thus, the risk/reward is slowly moving towards upside reward, but we have 0 signs of a bottom yet, which requires at least a break above ~\$12,418.

NASDAQ 100/NASDAQ (NDX/NAS)

Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~4 weeks) BEARISH

WAVE LABEL KEY BEARISH RESOLUTION

[W-4] Major Impulse Wave	[W-a] Intermediate Corrective wave	[W-c] Minor Corrective	[W-iii/c] Minute Impulse	[W-c] Micro Corrective	[W-iii, iv, v] Nano Impulse	\$27400 Fib targets
---------------------------------------	---	-------------------------------------	---------------------------------------	-------------------------------------	--	-------------------------------

CURRENT WAVE POSITION

Today, the index broke below \$28,814, so we are more certain that **W-c** of **W-a** of **W-4** is underway as a subdividing ending diagonal; an abc-abc-abc-abc (3-3-3-3) structure.

With today's decisive follow-through breakdown, we are now tracking the completion of an ending diagonal **W-c**, which ideally should see a smaller **W-iv, v** sequence to complete **W-c** of **W-iii/c**, followed by ideally one more **W-iv** and **W-v** before a larger bounce (**W-b**) can materialize. Above \$29,771 from current levels and **W-b** is already underway..

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: The ideal downside target remains ~\$27,400, as that's where the three different wave degrees' Fib extensions overlap. It requires a break above \$29,771 to negate this ending diagonal path.

SMALL CAPS (SML)

Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~4 weeks) BEARISH.

WAVE LABEL KEY (based on daily chart)

[W-3] Major Degree Impulse wave	[W-iv] Intermediate Impulse	[W-c] Minor Impulse	[W-a] Minute Impulse	\$1660+/-20 Fib target zone
--	--	----------------------------------	-----------------------------------	---------------------------------------

CURRENT WAVE POSITION

W-iii of **W-3** has most likely ended (>80% chance), **W-b** of **W-iv** has likely topped, and **W-c** of **W-iv** is underway.

The index tagged the 76.4% retrace of the prior decline yesterday, a classic B-wave retrace, and reversed today, but a break below last week's low is still required to confirm **W-c**. Then we look for \$1660+/-20.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: **W-iv** to \$ 1660 +/- 20 is most likely underway, subdividing into **W-a**, **b**, and **c**, with **W-c** likely to get started. A break above Thursday's high means **W-b** is still underway. A break below last week's low is still required to confirm **W-c**.

CRYPTO CURRENCIES

BITCOIN (BTC)

Outlook: Medium term (weeks to ~6 months) **BULLISH**. Short-term (days to ~4 weeks) **BULLISH**.

WAVE LABEL KEY

[W-v] Intermediate Impulse wave	[W-1] Minor Impulse	[W-iii] Minute Impulse	[W-2] Micro Impulse	\$~75K Fib target zone
---------------------------------------	---------------------------	------------------------------	---------------------------	---------------------------

CURRENT WAVE POSITION

W-iii of W-1 of W-v should be underway, contingent on holding above \$61,761, subdividing into five smaller (orange) waves.

W-1 of W-v should be underway, subdividing into five smaller waves.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

Radars lock (20%)	Shot across the bow (40%)	1 st hit Caution (60%)	2 nd hit critical (80%)	3 rd hit, ship sinks (100%)
----------------------	------------------------------	--------------------------------------	---------------------------------------	---

Key Finding: Our preferred view remains that (W-v) to new ATHs is getting started with a first wave W-1 underway.

ETHEREUM (ETH)

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~4 weeks) BULLISH.

WAVE LABEL KEY

[W-5] Major Impulse Wave	[W-i] Intermediate Impulse	[W-1] Minor Impulse	[W-ii] Minute Corrective wave	\$2450+/-50 Fib target zone
---------------------------------------	---	----------------------------------	--	---------------------------------------

CURRENT WAVE POSITION

W-i of W-1 of W-i may have topped.

W-i may have topped and W-ii is underway to ideally retest the 50d SMA at ~\$1,740. Not shown here, but a break above \$1,965 will propel ETH above its Ichimou cloud allowing it to target the 200d SMA.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
-----------------------------	--------------------------------------	---	--	--

Key Finding: Our preferred view remains that (W-5) to new ATHs is getting underway, with a first-wave W-i top likely in or close if we are dealing with a diagonal structure. Overall, the price action is constructive as price is above its 20d and 50d SMAs, with the 20>50.

GOLD, MINERS & OIL

GOLD MINERS (GDX)

Outlook: Medium term (weeks to ~6 months) **BULLISH**. Short-term (days to ~4 weeks) **BEARISH**

WAVE LABEL KEY

[W-4] Major Impulse wave	[W-c] Intermediate Impulse	[W-5] Minor Impulse	[W-c] Minute Impulse	~\$68+/-3 Fib target zone
---------------------------------------	---	----------------------------------	-----------------------------------	-------------------------------------

CURRENT WAVE POSITION

W-c of **W-4** is still subdividing with **W-c** of **W-5** underway, contingent on holding below at least \$76.90.

Last week's low did not hold, so we look for lower prices for a subdividing final 5th wave, ideally ~\$68+/-3, from which the bulls can try again. However, back above \$80, the Bears are probably going to hibernate for a while, as that strongly suggests the low is in place.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	---------------------------------	----------------------------------	--------------------------------------

Key Finding: **W-5** of **W-c** of **W-4**, as an ending diagonal, decided to subdivide and should now ideally target ~\$68+/-3. Above \$80, however, and the low is already in. Risk-reward remains skewed towards upside for those who want to play the long-term game.

GOLD (GLD)

Outlook: Medium term (weeks to ~6 months) **BULLISH**. Short-term (days to ~4 weeks) **BULLISH**

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse	[W-2] Minor Impulse	[W-i] Minute Impulse	\$4,900+/-100 Fib target zone
---------------------------------------	---	----------------------------------	-----------------------------------	---

CURRENT WAVE POSITION

W-i of **W-5** is likely underway, contingent on holding above \$3,941. .

For as long as the late June low holds, we prefer to see a W-4 low in place. Below it opens the door for another leg lower to \$3,650+/-50 before the Bulls can try again.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: **W-c** of **W-4**, likely ended last month. Positive divergences were a month long, supporting the case for higher prices. Thus, we view GOLD as in **W-i** of **W-5**, but below last month's low targets \$3,650+/-50. Now GOLD needs to rally above \$4,250 to target ideally ~\$4,750+/-50 for a 3rd wave: **W-3** of **W-i**.

BRENT (OIL, UCO, USO).

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~4 weeks) BULLISH.

WAVE LABEL KEY

[W-3/c] Major Impulse wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse	[W-v]? Minute Impulse	\$90+/-2 Fib target zone
---	--	----------------------------------	------------------------------------	------------------------------------

CURRENT WAVE POSITION FOR BRENT

W-v of **W-1** of **W-i** of **W-3/c** should now be underway, contingent on holding above \$83.34, with a first good warning for the Bulls below \$80.57.

Based on closing prices, where down days are counted as corrective (2nd and 4th waves) we can count now five waves up or BRENT, and **W-1** is likely targeting only \$90+/-2 before **W-2** kicks in.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: As stated yesterday, “the Bulls will be in the clear after we see five gray waves up.” That’s what we have now, based on closing prices; thus, we expect **W-1** to wrap up, followed by a brief pullback for **W-2** before **W-3** should kick in. The pullback should hold above \$75.31, or the impulse pattern is being pressured.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
