JOIN ME ON PEAKBOT*

THANK YOU TO THOSE WHO ALREADY JOINED ME ON PEAKBOT. SO FAR, I AM **UP \$347** IN CLOSED TRADES SINCE I STARTED ON JULY 17

Trade what I trade, without lifting a finger, by connecting your brokerage account through [PeakBot](https://peakbot.com/intelligent-investing-bot/) to my account: <https://peakbot.com/intelligent-investing-bot/>. **Starting at \$197/month.**

I **returned over 100% (\$10,000) within three months**, primarily using SPY options. I am committed to providing this type of cash flow, regardless of market conditions, as I trade both the long and short sides through intermediate-dated SPY calls and puts (~6-8 weeks out) using my own Elliott Wave work exclusively!

My goal is to make ~\$100/day, which is ~\$500/week and ~\$ 2,000/month, knowing well that not all market environments are conducive to such returns.

My strategy gives the market time to validate my Elliott Wave thesis and avoids being a victim of options' time decay (theta) when wrong. I trade at most 3x per day; positions are rarely >50% of my portfolio; I average down at most 2x (e.g., at the 3rd and 5th waves); and I hedge-trade around a core position if necessary (e.g., at the 2nd and 4th waves). Most trades are swing- or intra-day.

Requirements:

- \$10K investment minimum

DOW JONES INDUSTRIAL AVERAGE (DOW)

Outlook: Medium term (weeks to ~6 months) **BEARISH**. Short-term (days to ~4 weeks) **NEUTRAL**.

WAVE LABEL KEY BEARISH RESOLUTION

W-b could have topped as the ideal target zone was reached today. Below Monday's low confirms **W-c** to ideally \$50,200-51,200. If Monday's low holds and the index breaks above today's high, then **W-b** continues to the upper end of the target zone.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

[W-4] Major Impulse Wave	[W-a] Intermediate Corrective wave	[W-c/3] Minor Impulse	[W-i/a, ii/b, iii/c, iv?, v?] Minute Impulse	\$7280-7375 Fib targets
---------------------------------------	---	------------------------------------	---	-----------------------------------

CURRENT WAVE POSITION

W-c/3 of **W-a** of **W-4** should be underway with a subdividing three- or five-wave structure developing.

Yesterday we stated, "While we can allow for even higher prices, as the index did not even reach the orange target zone, it is not necessary, as we came very close (8p). Resistance is in the 7551-7581 zone, and if the index holds under this zone, the preferred scenario is for the **W-ii/b** of the larger wave **c** down." Today we got marginally higher (\$7,525), which is exactly where **c=a**, and the index started to decline from there closing lower. So far so good. Thus, below yesterday's low increases the odds tremendously that **W-iii/c** is underway to ideally \$7280-7375, depending on the extension. The least bearish option is for only a **W-5** of **W-i** to \$7,410+-10, from where a **W-ii** can try again. Below \$7,400 greatly increases the odds this option is NOT in play. '

Yesterday, we also presented a third option, due to all the abc's, showing a continued triangle **W-b**, which will see a drop to ~\$7,340 for **W-d**, another rally to overhead resistance for **W-e** of **W-b**, followed by the **W-c**. We are not saying this will happen; we are merely showing the potential for it. We have 0 indication it is operable, but since we are in a confusing, sideways, 4th wave pattern, we must recognize this environment for what it is and be ready for come what may.

At this stage, we don't have a Bullish alternative count as we have a hard time applying one. BUT, as stated yesterday, and just in case, "Resistance is in the 7551-7581 zone, ... If the index moves over the 7581 level, then 7740 is back on tap."

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

WAVE LABEL KEY

[W-3] Major Impulse wave	[W-iv] Intermediate corrective wave	[W-a] Minor Corrective	[W-v] Minute Impulse	[W-4,5] Micro Impulse	~\$10,750+/-250 Fib target zone
---------------------------------------	--	-------------------------------------	-----------------------------------	------------------------------------	---

CURRENT WAVE POSITION

W-a of **W-iv** continues to subdivide and is likely setting up for a last 5th wave lower, which should subdivide into three waves.

The index is preferably in a leading diagonal **W-a** of **W-iv**, ideally \$10,750+/-250, from which a larger bounce can materialize. The diagonal could have ended, but we prefer one more 5th wave lower, as today could have been the 4th wave, before a larger bounce can start (**W-b**).

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: the alternative option (blue dotted lines) presented in Monday's late update has filled in even better today, and we view this as a **W-4**, as the rally from is so far overlapping, i.e., corrective. Thus, **W-a** can still be considered underway as a leading diagonal, with one more **W-5** sequence to go before a larger bounce should materialize. The index will have to rally above \$12,846 to tell us a larger bounce is underway (2nd chart). This is our alternate count. However, **B**-waves always comprise three waves (**a-b-c**), and we would expect the **W-a** to top in the blue target zone (Reached), a **W-b** down to the gray target zone, followed by a **W-c** to the gray/green target zone. Warning levels for this count are presented on the chart.

NASDAQ 100/NASDAQ (NDX/NAS)

Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~4 weeks) BEARISH

NO CHANGES FROM YESTERDAY, AND WITH TSLA AND GOOG DOWN 3-4% ON EARNINGS IN AFTER HOURS WE SEE NO REASON THE PREFERRED COUNT IS NOT PLAYING OUT.

WAVE LABEL KEY BEARISH RESOLUTION

[W-4] Major Impulse Wave	[W-a] Intermediate Corrective wave	[W-c] Minor Corrective	[W-iii, iv?, v?] Minute Impulse	~\$27,500 Fib targets
---------------------------------------	---	-------------------------------------	--	---------------------------------

CURRENT WAVE POSITION

W-c of **W-a** of **W-4** is underway as a subdividing ending diagonal; an abc-abc-abc-abc (3-3-3-3) structure.

The index moved above yesterday's high and thus confirmed the larger **W-iv**. Note how it reached the 123.60% extension of **W-a/i**, measured from **W-b/ii** (gray down arrow, 1st chart), which is a common 3rd wave target for diagonals. The current rally back to the 61.80% extension is also a common 4th wave target. Now a 5th wave should then materialize, where **v=i**, targeting the 161.80% at \$27,484. That would be picture perfect. Thus, a break below yesterday's low will go a long way to confirm **W-v**, while the Bears want to hold price below \$29,771 or face the consequence of a counter-trend rally.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: The ideal downside target remains ~\$27,400, as that's where the three different wave degrees' Fib extensions overlap. It requires a break above \$29,771 to negate this ending diagonal path.

MARKET BREADTH

NYAD, SPX-AD, SPXMO, SPXSI, NYMO, NYSI,
Outlook: Medium term (weeks to ~6 months) **BEARISH**. Short-term (days to ~4 weeks) **BEARISH**.

The cumulative NYSE and SPX A/D lines broke below the uptrend line since the March low this week, and below the uptrend line since June, respectively. These are bearish developments, supporting lower prices. The only thing in the way of the bears is the final uptrend line since the March 2025 low (3rd chart) a close below that will add weight to the bearish evidence.

Junk bonds, which are high risk and trade like stocks, show negative divergences (red box). Not a good sign either, as previous such divergences led to corrections of varying degrees.

Like bonds, the Bullish Percent Indices for the NYSE and SPX show persistent negative divergences lasting for many months: red dotted arrows. Prior such setups all led to corrections of varying degrees.

Similarly, there's a lot of negative divergence on the S&P500's summation index, meaning fewer stocks participate on each new rally. In addition, the SI just gave a sell signal, as the underlying McClellan Oscillator has been negative for the last few days.

CRYPTO CURRENCIES

CURRENT WAVE POSITION

W-iii of W-1 of W-v should be underway, contingent on holding above \$62,474, subdividing into five smaller (orange) waves.

W-1 of W-v should be underway, subdividing into five smaller waves.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

Radar lock (20%)	Shot across the bow (40%)	1 st hit Caution (60%)	2 nd hit critical (80%)	3 rd hit, ship sinks (100%)
---------------------	------------------------------	--------------------------------------	---------------------------------------	---

Key Finding: Our preferred view remains that (W-v) to new ATHs is getting started with a first wave W-1 underway.

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~4 weeks) BULLISH.

[W-5] Major Impulse Wave	[W-i] Intermediate Impulse	[W-1] Minor Impulse	[W-i] Minute Impulse	\$2050+/-50 Fib target zone

GOLD, MINERS & OIL

GOLD MINERS (GDX)

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~4 weeks) BULLISH.

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse	[W-1] Minor Impulse	[W-iii, iv, v] Minute Impulse	~\$84+/-2 Fib target zone
---------------------------------------	---	----------------------------------	--	-------------------------------------

CURRENT WAVE POSITION

Price broke above \$76.90, so we are now tracking an impulse higher.

Today's break above \$76.90 adds serious weight to the evidence that **W-5** is underway. We are now tracking an impulse higher and have switched the warning levels to those for the Bulls. Thus, as long as last week's low holds, with a serious warning below \$72.11, we can allow for higher prices.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: W-5 of **W-c** of **W-4**, as an ending diagonal, most likely ended at \$69.74 last Friday, and **W-5** is most likely (>80% chance) underway. Thus, as stated many times before, *"the risk-reward remains skewed towards upside reward,"* and we now track for an impulse up that must hold above at least \$72.11 and especially last week's low!

GOLD (GLD)

Outlook: Medium term (weeks to ~6 months) **BULLISH**. Short-term (days to ~4 weeks) **BULLISH**

NO CHANGES FROM YESTERDAY AS TODAY'S RALLY ADDS WEIGHT TO THE EVIDENCE THAT THE LOW IS IN AND THAT OUR BULLISH STANCE IS STILL CORRECT.

WAVE LABEL KEY

[W-5] Major Impulse wave	[W-i] Intermediate Impulse	[W-2] Minor Impulse	[W-i] Minute Impulse	\$4,850+/-50 Fib target zone
---------------------------------------	---	----------------------------------	-----------------------------------	--

CURRENT WAVE POSITION

W-i of **W-5** is likely underway, contingent on holding above \$3,941.

For as long as the late June and also last Friday's low holds, we prefer to see a **W-5** getting started.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: **W-c** of **W-4**, likely ended last month. Positive divergences were a month long, supporting the case for higher prices. Thus, we view GOLD as in **W-i** of **W-5**, but below last month's low targets \$3,650+/-50. Now GOLD needs to rally above \$4,250 to target ideally ~\$4,750+/-50 for a 3rd wave: **W-3** of **W-i**.

BRENT (OIL, UCO, USO).

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~4 weeks) BULLISH.

WAVE LABEL KEY

[W-3/c] Major Impulse wave	[W-i] Intermediate Impulse wave	[W-1] Minor Impulse	[W-iii] Minute Impulse	[W-3, 4, 5] Micro Impulse	\$102+/-2 Fib target zone
---	--	----------------------------------	-------------------------------------	--	-------------------------------------

CURRENT WAVE POSITION FOR BRENT

W-iii of **W-1** of **W-i** of **W-3/c** is underway, subdividing into five smaller (orange) waves.

With the continued rally and high (= strong) RSI5 reading, it is more likely that BRENT is in a subdividing W-iii of **W-1**, targeting 102+/-2 before **W-2** kicks in.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

Radar lock (20%)	Shot across the bow (40%)	1st hit Caution (60%)	2nd hit critical (80%)	3rd hit, ship sinks (100%)
----------------------------	-------------------------------------	--	---	---

Key Finding: We expect **W-1** to wrap up with a 4th and a 5th wave yet to come, ultimately targeting \$102-106, followed by a pullback for **W-2** to ideally \$82+/-2 before **W-3** should kick in. The gray **W-iii** should ideally target \$98+/-2, the gray **W-iv** should fall back to around \$88+/-2, followed by gray **W-v** to ideally \$102+/-2. That's for now the ideal path we're tracking.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
