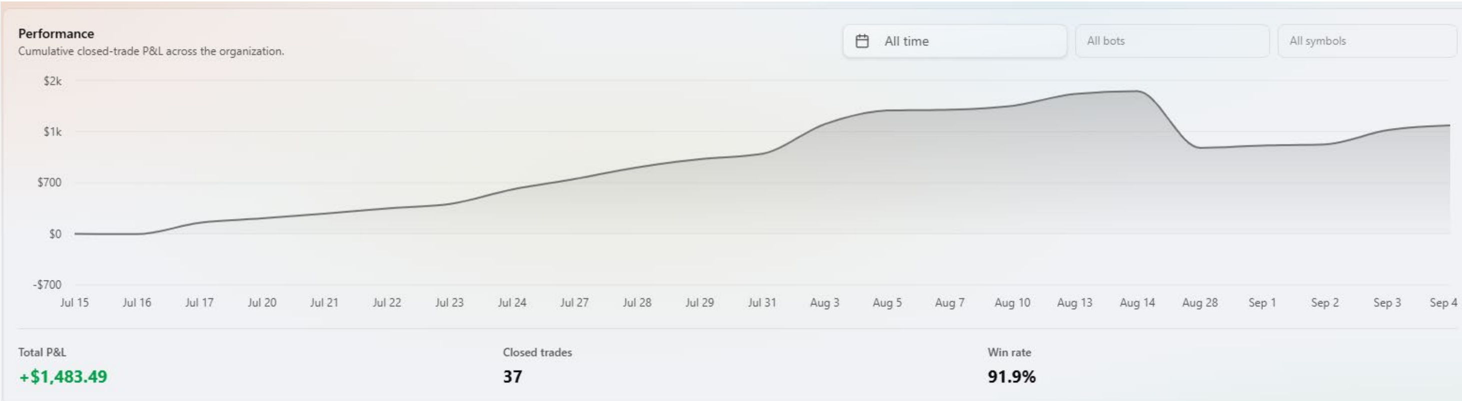
JOIN ME ON PEAKBOT*

THANK YOU TO ALL OF THOSE WHO ALREADY JOINED ME ON PEAKBOT. SO FAR, I AM UP ~$1480 IN CLOSED TRADES SINCE INCEPTION ON JULY 17!



Trade what I trade, without lifting a finger, by connecting your brokerage account through PeakBot to my account: https://peakbot.com/intelligent-investing-bot/. **Starting at $197/month**.

My goal is to average ~$100/day, which is ~$500/week and ~$2,000/month, while knowing full well that not all market environments are conducive to those returns.

My strategy gives the market time to validate my Elliott Wave thesis and avoids being a victim of options' time decay (theta) when wrong. I trade at most 3x per day; positions are rarely >50% of my portfolio; I average down at most 2x (e.g., at the 3rd and 5th waves); and I hedge-trade around a core position if necessary (e.g., at the 2nd and 4th waves). Most trades are swing- or intra-day**.**

Requirements:

- $10K investment minimum
- Tradier, Schwab, or Tasty Trade account

CURRENT WAVE POSITION

As explained yesterday, the preferred count is that the **W-2/b** is morphing into an irregular flat. See chart 1. We don't yet know whether the flat will be regular (**c=a**; at yesterday's high) or expanded (**c>a**). How will we know?

- Above yesterday's high: expanded. Expect up to 54350+/-50.
- Below Tuesday's low, without going above yesterday's high: regular. Expect **W-3/c** to be underway.

Our alternative is that the larger **W-3** is continuing as an expanding ending diagonal flat **W-5**, targeting a max of ~55880. See chart 2.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

CURRENT WAVE POSITION

Very simple: Above 7771, the final W-5 of W-v is likely underway, with an ideal target of ~7900+/100 (chart 1, 2). Below 7611, the W-c/iii is underway with an ideal target of ~7375+/-50 (chart 3, 4; next page).

Major Corrective	Intermediate Corrective	Minor Impulse	Minute Impulse	Micro Impulse	Invalidation level	Fib target zone

CURRENT WAVE POSITION

Our preferred view is that the W-2 of W-c/iii is underway if the index holds below 11910. See chart 1. Above it, we're moving to an ending diagonal W-c of W-iv, with yesterday's low W-a/i, W-b/ii underway to ideally 12100+/-100, followed by W-c/iii, etc. See chart 2.

Because all price action over the last 1-2 months is a string of ABCs, we can interpret the price as a drawn-out W-b. Since B-waves are the most complex and always comprise a set of ABCs, this interpretation is possible, so we present it. But we have no way of knowing it is operational, so we give it low odds. This would mean that the August high is W-a, Tuesday's low is W-b, and we are now in W-c. It requires always holding above Tuesday's low and breaking above the August high.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

CURRENT WAVE POSITION

As explained yesterday*, the preferred count is that the **W-2/b** is morphing into a flat. See chart 1. We don't yet know whether the flat will be regular (**c=a**; at yesterday's high) or expanded (**c>a**). But,

- Above yesterday's high: Expect 29750-30000 (larger orange target box).
- Below Tuesday's low, without going above yesterday's high, we can expect **W-3/c** to be underway.

******The late-August rally was most likely* ***W-a*** *of* ***W-b/2****; the decline into Tuesday's low,* ***W-b*** *of* ***W-b/2****, and now* ***W-c*** *should be underway, if the index can stay above at least 29165. The* ***W-c*** *should subdivide into five smaller (orange) waves, with* ***W-3*** *having topped,* ***W-4*** *underway, ideally and possibly already having bottomed in its target zone, and a final* ***W-5*** *to commence.*

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend or downtrend is over.

WAVE LABEL KEY

[W-v] Intermediate Impulse wave	[W-1] Minor Impulse	[W-v] Minute Impulse	72959 Invalidation level	~85-95K Fib target zone

CURRENT WAVE POSITION

While the stock markets and the SPX in particular are a headache-causing mess, BTC is a beauty as it tracks so well. Hence, focus on this; don't focus on what doesn't work well 😊 **W-iv** has bottomed, as the current sideways mess, which we labeled "*constructive, as cryptos tend to have blowoff tops,*" has resolved -as expected- higher for **W-v**. Thus, the "*healthy digestion of recent gains before it can move higher*" has ended, and **W-v** of W-1 should be underway.

The alternative is that this is only **W-5** of **W-iii** of **W-1** (as per the ETH count on the next page).

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

CURRENT WAVE POSITION

While the stock markets and the SPX in particular are a headache-causing mess, ETH is a beauty as it tracks so well. Hence, focus on this; don't focus on what doesn't work well 😊 **W-iv** has most likely bottomed, as the current sideways mess, which we labeled "*constructive, as cryptos tend to have blowoff tops,*" is resolving higher -as expected- higher for **W-v**. Thus, the "*healthy digestion of recent gains before it can move higher*" has most likely ended, and **W-v** of **W-3** should be underway. Note the bull flag pattern that is forming (black square and vertical dotted lines) targeting ~$3000, which matches the upper end of our target zone. Alternatively, this is **W-5** of **W-i** of **W-5** (per the BTC count on the previous page).

WAVE LABEL KEY: BULLISH WAVE COUNT

[W-5] Major Impulse wave	**[W-i]** Intermediate Impulse	**[W-4]** Minor Impulse	**87.5** Invalidation level	**$114+/-4** Fib target zone

CURRENT WAVE POSITION

The recent pullback stayed within the "***W-4** to approximately $98+/-2*" parameters, and the 3rd warning level hasn't been broken; it remains our preferred count. Meanwhile, due to GOLD, although we should not correlate tickers, our alternative POV (chart 2) gained traction: the **W-i** is complete. But we have no signs that is the actual path GDX is on. Thus, while we still must see a break above 102.10 to turn our attention fully to the **W-5** scenario again, the current rally can still be considered a B-WAVE bounce. As such, we are NEUTRAL for the short-term.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

WAVE LABEL KEY

Major Impulse wave	Intermediate corrective	Minor corrective	Invalidation level	Fib target zone

CURRENT WAVE POSITION

Ou preferred view is that **W-ii** is underway (chart 1). On Tuesday we wrote that "*We expect this 2nd wave to subdivide into a cleaner **a-b-c** pattern, with the current leg lower as **W-a**, followed by a bounce for **W-b** to ideally around the 200d SMA ($4520) and then a **W-c** to complete all of **W-ii** at ideally around $4150.*" So far this is EXACTLY what happened. A break, i.e., daily close below today's low will confirm **W-c**.

CURRENT WAVE POSITION FOR BRENT

BRENT and WTIC both bottomed right in the ideal W-2 target zones, and W-3 should now be underway, subdividing into five smaller (gray) waves, with the W-i top about in, W-ii pending to around $92+/-1, followed by a W-iii, etc. I am not sure if the stock market -or consumers…- can handle this 3rd of a 3rd of a 3rd wave….

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs. Any AI, such as GROK or ChatGPT, can quickly translate code into another language if necessary.
