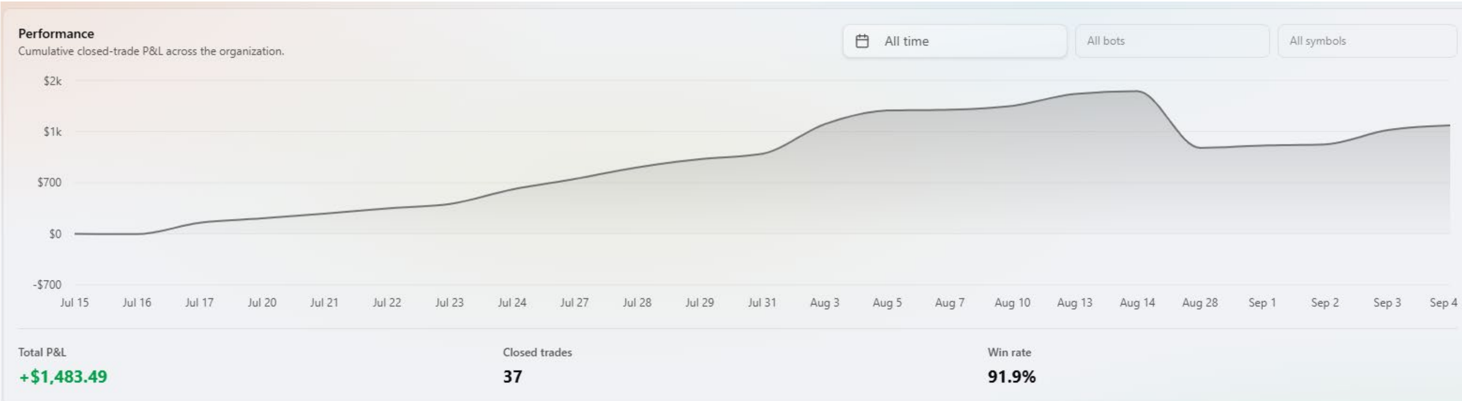
THANK YOU TO ALL OF THOSE WHO ALREADY JOINED ME ON PEAKBOT. SO FAR, I AM UP ~$1480 IN CLOSED TRADES SINCE INCEPTION ON JULY 17!



Trade what I trade, without lifting a finger, by connecting your brokerage account through PeakBot to my account: https://peakbot.com/intelligent-investing-bot/. **Starting at $197/month.**

My goal is to average ~$100/day, which is ~$500/week and ~$2,000/month, while knowing full well that not all market environments are conducive to those returns.

My strategy gives the market time to validate my Elliott Wave thesis and avoids being a victim of options' time decay (theta) when wrong. I trade at most 3x per day; positions are rarely >50% of my portfolio; I average down at most 2x (e.g., at the 3rd and 5th waves); and I hedge-trade around a core position if necessary (e.g., at the 2nd and 4th waves). Most trades are swing- or intra-day**.**

Requirements:

- $10K investment minimum
- Tradier, Schwab, or Tasty Trade account

IF YOU ARE CONNECTED BUT NO TRADES ARE BEING EXECUTED, MAKE SURE TO ACTIVATE THE TICKERS (SPY or QQQ and preferably BOTH): **it's your job to activate those tickers**.

DOW JONES INDUSTRIAL AVERAGE (DOW) & NYSE

Outlook: Medium term (weeks to ~6 months) BEARISH. Short-term (days to ~2 weeks) BEARISH

WAVE LABEL KEY: BEARISH COUNT

[W-4] Major Impulse Wave	[W-a] Intermediate Impulse	[W-2/b] Minor Corrective	54744 Invalidation level	50000+/-500 Fib target zone

CURRENT WAVE POSITION

Unless this morphs into some inexplicable flat within a flat B-wave, the price action should be relatively straightforward because, as we stated on Friday

- *Above yesterday's high: expanded. Expect up to 54350+/-50.*
- *Below Tuesday's low, without going above yesterday's high: regular. Expect **W-3/c** to be underway.*

So far, the index has come within 30p of last Tuesday's low. Today it closed below the dotted gray uptrend line in place since May, and it also closed below its (blue) 50d SMA. A first since early April. Meanwhile, the MACD remains on a sell, and the RSI5 is pointing down. Overall, that's not a good look, so we should prefer the bearish wave count until proven otherwise.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the uptrend is over.

CURRENT WAVE POSITION

Not much has changed since Friday, other than that the smaller W-5 of W-v is off the table, and all we can give the Bulls now is an ending diagonal 5th wave, with W-2 of W-v now underway. It requires a break above 7771 to confirm this; below 7611 -or with five waves down from last week's high to ideally ~7625 (see chart 2)- still means W-c/iii is underway, with an ideal target of ~7375+/-50 (chart 3, 4; next page). Thus, the Bulls are slowly but surely running out of options. If/when we see this break lower and/or five (blue) waves lower for a/1, we can then start to fill in waves b/2, c/3 etc.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance that the uptrend or downtrend is over.

CURRENT WAVE POSITION

Leave it to the market to make things -as usual, or else it would be too easy, wouldn't it?!- more complicated, as the alternative: "*Above 11910, we're moving to an ending diagonal **W-c** of **W-iv**, with yesterday's low **W-a/i**, **W-b/ii** underway to ideally 12100+/-100, followed by **W-c/iii**, etc. See chart 1.*"

Because all price action over the last 1-2 months is a string of ABCs, we can still interpret the price even as a drawn-out **W-b**. Since **B**-waves are the most complex and always comprise a set of **ABC**s, this interpretation is possible, so we must continue to present it. But we have no way of knowing it is operational, so we give it low odds. This would mean that the August high is **W-a**, last week's low is **W-b**, and we are now in **W-c**. It requires always holding above last week's low and breaking above the August high to confirm this path. See chart 2.

Regardless, it appears, like for the DOW and SPX, that the options are starting to narrow down, which is a good thing.

WARNING LEVELS are shown on the chart. Percentages (%) indicate the chance the downtrend is over.

CURRENT WAVE POSITION

On Friday, we presented two options,

- *Above yesterday's high: Expect 29750-30000 (larger orange target box).*
- *Below Tuesday's low, without going above yesterday's high, we can expect* ***W-3/c*** *to be underway.*

The index did pop higher but only to 29655. Could this be a classic case of "*in bear markets upside disappoints?*" or will this **W-c** subdivide into five (orange) waves? TBD.

Overall, there are enough moves in place to consider the flat **W-b/2** move, which comprises three gray waves **a**-**b**-**c**, as complete, as these three gray waves subdivided nicely into a **3**-**3**-**5** pattern: **abc**-**abc**-**12345** move. See chart 1.

Now we need to see a break below 28953 to confirm that **W-b/2** is complete. Until then, we can still see some more upside until at least 29165 gives way.

WAVE LABEL KEY

[W-v] Intermediate Impulse wave	[W-1] Minor Impulse	[W-v] Minute Impulse	76258 Invalidation level	~85-95K Fib target zone

CURRENT WAVE POSITION

Our preferred view remains that W-v of W-1 should be underway, contingent on holding above $76258, and that this wave is subdividing into five smaller (orange) waves: W-2 of W-v of W-1 could have bottomed today right at the 76.4% retracement of W-1 in a three (blue abc) wave move. A move above $81K will confirm this. The Bollinger bands are tight, so another big move is coming. Assuming we are correct, we expect W-5, using standard Fibonacci-based patterns, to reach ~$89K.

CURRENT WAVE POSITION

Our preferred view remains that W-v of W-3 should be underway, contingent on holding above $2355, and that this wave is subdividing into five smaller (orange) waves: W-2 of W-iii of W-3 could have bottomed today right in the ideal target zone of W-1 in a three (blue abc) wave move. A move above $2520, the upper end of the bull flag, will confirm this. The Bollinger bands are tight, so another big move is coming. Assuming we are correct, we expect W-5, using standard Fibonacci-based patterns, to reach ~$2820. Meanwhile, overall the bull flag pattern continues to fill in, and no critical levels have been broken.

CURRENT WAVE POSITION

While the current pullback stayed within the "***W-4** to approximately $98+/-2*" parameters, and the 3rd warning level hasn't been broken; given where we think GOLD is, the alternative POV (chart 2) continues to gain traction: the **W-i** is complete. A break below last week's low will confirm this count, while a break above at least Thursday's high is needed to confirm the **W-5**. Until then we remain NEUTRAL.

Outlook: Medium term (weeks to ~6 months) BULLISH. Short-term (days to ~2 weeks) BULLISH

CURRENT WAVE POSITION FOR BRENT

BRENT's wave count suggests **W-iii** is already underway, whereas with WITC we can allow for the W-ii to drop price a bit over the next few days before **W-iii** kicks in. But beggars can't be choosers, and if oil is indeed in the heart of its 3rd wave, any dip will be bought quickly. So, overall, both are making higher highs and higher lows since the summer low, which is a bullish pattern. Both are also above their rising moving averages, which are 100% bullishly stacked: price>10>20>50>200. Meanwhile, both are riding their upper Bollinger band; their technical indicators are pointing up, strong, and on buy signals. Thus, overall these are strong charts, which thus favor the strongest EWP count: the one for BRENT.

*BACKTESTED TRADING SYSTEM PERFORMANCES

Our new trading systems work best when you apply the compounding principle, which involves reinvesting some or all your profits into the next trade. The more you compound, the better the returns will be. Please review the tables below.

Do not trade positions bought without the system's signals using the system's trading signals. Additionally, please refrain from entering a position when the trade is already in progress; wait for a new trading signal.

These systems operate entirely independently of our analysis. Do not try to combine or correlate them. They track prices and trends across several parameters, triggering buy, sell, or hold signals based on if/then conditions. Sometimes our analysis is correct while the system is wrong, or vice versa. Or both can be right or wrong. Therefore, these systems complement our analyses and represent the ultimate trading experience: simply execute the signal. Refer to the previous page for what trading really is: a mindless, boring process of execution. Nothing more, nothing less.

The code for these trading systems is available for purchase. Please contact us for pricing details. It is written in Pine Script and can be integrated directly with TradingView, Alpaca, or Interactive Brokers (IBKR), enabling it to manage all your trading needs.
